## X App Oscar Predictions Guide:

*Parallel and Distributed Processing and Applications* Jiannong Cao, Laurence T. Yang, Minyi Guo, Francis Lau, 2005-01-17  
Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong, China, 13-15 December 2004. With the advance of computer networks and hardware technology, parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches. It provides a means to solve computationally intensive problems by improving processing speed. It is also the only

able approach to building highly reliable and inherently distributed applications. ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences, new ideas, research results and applications about all aspects of parallel and distributed computing. There was a very large number of paper submissions, 361 from 26 countries and regions, including not only Asia and the Pacific but also Europe and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers. It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions. In order to allocate as many papers as possible and keep the high quality of the conference, we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations. We believe that all of these papers and topics not only provide novel ideas, new results, work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications.

**Engineering Applications of Neural Networks** Christina Jayne, Shigang Yue, Lazaros S. Iliadis, 2013-04-19  
This book constitutes the refereed proceedings of the 13th International Conference on Engineering Applications of Neural Networks (EANN 2012) held in London, UK, in September 2012. The 49 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers describe the applications of neural networks and other computational intelligence approaches to intelligent transport, environmental engineering, computer security, civil engineering, financial forecasting, virtual learning environments, language interpretation, bioinformatics and general engineering.
