measuring pragmatic knowledge e.g. a Metapragmatic Knowledge Test and role plays and more original tests e.g. an Irony Test and an Elicited Imitation Test. They explain the development of the tests and report the results of their work with native speakers of English and Chinese and Japanese L2 learners. A confirmatory factor analysis lends support to the theoretical basis of the tests. The authors also report studies that explored the use of the tests to investigate L2 linguistic proficiency study abroad and formal instruction. In concluding they consider the strengths and limitations of the tests and propose some directions for future research.
