## Preparation Guide

This preparation guide helps you prepare for spatial reasoning assessments. It provides guidance on how best to approach the assessment, allowing you to give your best possible performance.

### Why are Aptitude Assessments used?

Employers often use aptitude assessments as part of their assessment procedures for the selection and development of staff. Research has shown that they are powerful predictors of performance at work.

### Assessments help you to:

- demonstrate your strengths
- be assessed fairly on job relevant criteria
- find out more about your strengths and development needs
- make future career decisions based on your abilities

### Assessments help employers to:

- select people best suited to the demands of the job
- identify areas where individuals might benefit from further development
- obtain objective information about people's abilities

## Instructions

On the following pages are some practice questions which are similar to those you will be asked in the assessment. Completing these will help you to understand the types of questions used and gain experience in taking ability tests.

This exercise is designed to assess your ability to understand and reason with mechanical principles. You will be presented with a series of drawings, each followed by a question with three answer options. Your task is to choose the best answer to each question from the options given. Answer each question by filling in the option you have chosen on your answer sheet.

When you complete the actual assessment, you will not be able to use erasers to change your answer.

Please see the instructions below on how to indicate your answers:

#### Instructions for completing the answer sheet:

Press hard and completely fill in the inner circle.

To change an answer, put a cross through the circle you wish to change and then fill in the correct circle.

If you want to change back to your original answer, cross out the incorrect answer and completely fill the outer circle of the previous answer.

The actual test is strictly timed, so time yourself and try to complete all 4 questions within 90 seconds to practice working against the clock.

Set a timer for 90 seconds (or note down your start time), turn to page 2 and begin.
