Microprocessor Technology David L. Terrell, 1983 **Microprocessor Technology** J S Anderson, 2012-08-21

Microprocessor Technology provides a complete introduction to the subject of microprocessor technology using the Z80 and 6502 processors. An emphasis on fault finding and repair makes this an ideal text for servicing courses including City Guilds 2240 in the UK microelectronics units on BTEC National Advanced GNVQ and City Guilds 7261 Microprocessor Technology. It will also provide a refresher course for those on bridging and micro appreciation courses where a measure of comparative studies is required. Clear and concise explanations are supported by worked examples, tutorials, long answer questions and assignments giving students the opportunity to test their knowledge as they progress through the course as well as providing an essential revision tool in the run up to exams.

MICROPROCESSOR-BASED AGRI INSTRUMENTATION KANT, KRISHNA, 2013-01-01. This book provides the fundamental concepts of system design using microprocessors in the field of agriculture instrumentation. It begins with an introduction to the field of agriculture and application of instrumentation in agriculture and the book then covers the transducers specific to the agricultural field. The binary number system and arithmetic are covered as the basic building block of digital circuits and computer organization. The microprocessor basics and Intel 8085 hardware and software have been discussed in detail. The book describes microprocessor peripheral interfacing and its support chips such as Intel 8225, Intel 8253 and Intel 8279 along with their applications. It discusses analog to digital and digital to analog interface, CRT terminal interface and printer interface. In addition, the book includes case studies on various microprocessor applications in agriculture such as microprocessor based system design for grain moisture, safe grain storage, soil nutrient estimation and drip irrigation. Finally, the book ends with an advanced and futuristic topic on precision agriculture to give an exposure to students about future developments in the agricultural system. Key Features: From concepts to design, the book follows a step by step approach. Gives a large number of figures for easy understanding of theory. Includes a good number of examples and end of chapter exercises both in the hardware and software sections. Presents a number of case studies on the design of microprocessor based agri instrumentation systems. Offers exercises on the case studies which can be used for further development of the concepts. The book is primarily intended for the undergraduate and postgraduate students of agricultural engineering for their courses on agri instrumentation and microprocessor applications in agriculture.
