The Art of Data-Driven Business Alan Bernardo Palacio,2022-12-02 Learn how to make the right decisions for your business with the help of Python recipes and the expertise of data leaders Key FeaturesLearn and practice various clustering techniques to gather market insights Explore real life use cases from the business world to contextualize your learningWork your way through practical recipes that will reinforce what you have learnedBook Description One of the most valuable contributions of data science is toward helping businesses make the right decisions Understanding this complicated confluence of two disparate worlds as well as a fiercely competitive market calls for all the guidance you can get The Art of Data Driven Business is your invaluable guide to gaining a business driven perspective as well as leveraging the power of machine learning ML to guide decision making in your business This book provides a common ground of discussion for several profiles within a company You ll begin by looking at how to use Python and its many libraries for machine learning Experienced data scientists may want to skip this short introduction but you ll soon get to the meat of the book and explore the many and varied ways ML with Python can be applied to the domain of business decisions through real world business problems that you can tackle by yourself As you advance you ll gain practical insights into the value that ML can provide to your business as well as the technical ability to apply a wide variety of tried and tested ML methods By the end of this Python book you ll have learned the value of basing your business decisions on data driven methodologies and have developed the Python skills needed to apply what you ve learned in the real world What you will learnCreate effective dashboards with the seaborn libraryPredict whether a customer will cancel their subscription to a serviceAnalyze key pricing metrics with pandasRecommend the right products to your customersDetermine the costs and benefits of promotionsSegment your customers using clustering algorithmsWho this book is for This book is for data scientists machine learning engineers and developers data engineers and business decision makers who want to apply data science for business process optimization and develop the skills needed to implement data science projects in marketing sales pricing customer success ad tech and more from a business perspective Other professionals looking to explore how data science can be used to improve business operations as well as individuals with technical skills who want to back their technical proposal with a strong business case will also find this book useful

Trust and Records in an Open Digital Environment Hrvoje Stančić,2020-12-30 Trust and Records in an Open Digital Environment explores issues that arise when digital records are entrusted to the cloud and will

help professionals to make informed choices in the context of a rapidly changing digital economy Showing that records need to ensure public trust especially in the era of alternative truths this volume argues that reliable resources which are openly accessible from governmental institutions e services archival institutions digital repositories and cloud based digital archives are the key to an open digital environment The book also demonstrates that current established practices need to be reviewed and amended to include the networked nature of the cloud based records to investigate the role of new players like cloud service providers CSP and assess the potential for implementing new disruptive technologies like blockchain Stan i and the contributors address these challenges by taking three themes state citizens and documentary form and discussing their interaction in the context of open government open access recordkeeping and digital preservation Exploring what is needed to enable the establishment of an open digital environment Trust and Records in an Open Digital Environment should be essential reading for data information document and records management professionals It will also be a key text for archivists librarians professors and students working in the information sciences and other related fields *General*
