Measuring Interprofessional Education Collaborative Practice:

Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes Institute of Medicine, Board on Global Health, Committee on Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes, 2015-12-15 Interprofessional teamwork and collaborative practice are emerging as key elements of efficient and productive work in promoting health and treating patients. The vision for these collaborations is one where different health and or social professionals share a team identity and work closely together to solve problems and improve delivery of care. Although the value of interprofessional education (IPE) has been embraced around the world particularly for its impact on learning, many in leadership positions have questioned how IPE affects patient population and health system outcomes. This question cannot be fully answered without well designed studies and these studies cannot be conducted without an understanding of the methods and measurements needed to conduct such an analysis. This Institute of Medicine report examines ways to measure the impacts of IPE on collaborative practice and health and system outcomes. According to this report it is possible to link the learning process with downstream person or population directed outcomes through thoughtful well designed studies of the association between IPE and collaborative behavior. **Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes** describes the research needed to strengthen the evidence base for IPE outcomes. Additionally this report presents a conceptual model for evaluating IPE that could be adapted to particular settings in which it is applied. **Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes** addresses the current lack of broadly applicable measures of collaborative behavior and makes recommendations for resource commitments from interprofessional stakeholders, funders and policy makers to advance the study of IPE.

Examining the Psychometric Properties of an Interprofessional Education Competency Survey Cynthia Valdez Dougherty, 2016 This dissertation examines measurement of interprofessional education IPE competencies set forth by the Interprofessional Education Collaborative IPEC Expert Panel Background There is reason to believe that effective interprofessional collaborative care can lead to more positive health outcomes and quality patient care A Cochrane Collaborations Review suggests however that these professionals do not collaborate well together but that IPE offers a

potential way to improve interprofessional collaboration patient care and health outcomes The IPEC Expert Panel identified the following four core competency domains for interprofessional collaborative practice 1 values ethics for interprofessional practice 2 roles responsibilities 3 interprofessional communication and 4 teams and teamwork Methods This study aims to contribute to the field of measurement in IPE by utilizing Rasch analysis to examine the psychometric properties of the IPEC Core Competencies Survey Instrument Rasch analysis allowed the researcher to 1 examine response category functioning 2 assess item fit retention and reliability 3 examine person separation reliability and validity and 4 assess the unidimensionality of each measure Results and Implications Findings suggest it is a useful instrument and the researcher recommends minor revisions for improvement of the psychometric properties These revisions include the removal of one item each from the interprofessional communication scale and the teams and teamwork scale The structure of the values and ethics response scale was reduced from 5 response categories to 3 categories Discussion of the role of social work to take a lead in IPE and future directions for IPE measurement research are included The unique skill set of social work professionals and their natural role as facilitator convener and collaborator make them appropriate to take a leadership role in the national and global IPE conversation Repetition of scale administration is important in order for us to learn more about this measurement instrument and about the Core Competencies

Opportunities and Challenges of Interprofessional Collaboration and Education Jill Thistlethwaite, Peter Musaeus, Martina Mueller-Schilling, Sophie Schlosser, 2024-04-01 Interprofessional collaboration is essential in meeting today's health challenges which demand high flexibility and innovation Many health organizations including the World Health Organization WHO demand that interprofessional collaboration should be taught and learned globally Even so interprofessional education tools have not yet

been widely implemented in the curricula of medical professions incl physicians nurses pharmacists physiotherapists etc this training usually takes place separately Collaboration is necessary in health professions education as it can allow professionals to increase their skills and help them achieve more than they would at an individual level Collaboration also allows for more open minded approaches when facing new ways of thinking When knowledge is shared healthcare employees are more encouraged to share their own ideas and concerns These achievements of interprofessionalism within health profession education not only benefit the student and employee but also optimize patient care and increase patient safety Productivity can also be increased and therefore reduce costs overall
