Pavlik, 2008-05-12 Digital technologies have fundamentally altered the nature and function of media in our society reinventing age old practices of public communication and at times circumventing traditional media and challenging its privileged role as gatekeepers of news and entertainment Some critics believe these technologies keep the public involved in an informed discourse on matters of public importance but it isn't clear this is happening on a large scale Propaganda disguised as news is flourishing and though interaction with the digital domain teaches children valuable skills it can also expose them to grave risks John V Pavlik critically examines our current digital innovations blogs podcasting peer to peer file sharing on demand entertainment and the digitization of television radio and satellites and their positive and negative implications He focuses on present developments but he also peers into the future foreseeing a media landscape dominated by a highly fragmented though active audience intense media competition and scarce advertising dollars By embracing new technologies however Pavlik shows how professional journalism and media can hold on to their role as a vital information lifeline and continue to operate as the tool of a successful democracy

### **Media Policy for the Digital Age**

Netherlands Scientific Council for Government Policy, 2025-10-01 Traditionally the Netherlands has enjoyed being a test market for many ideas in the media But over the last decade progress has been severely hampered by lengthy discussions on the future structure of just one sector of media namely public broadcasting via radio and television The narrow approach results in a lot of paper speeches and theories but little in the way of definitive policy making In a report to the government published in February 2005 the Scientific Council for Government Policy WRR argued for very different approaches to policy making The recommendations are not only much broader than broadcasting they tackle the challenges of making robust policy from new angles Instead of trying to repair the old compass the approach has been to find new instruments to help policymakers navigate the stormy and often confusing waters ahead Perhaps the problem in the Netherlands is not accepting the new media but rather accepting that the role old media has undergone a paradigm shift Since the bulk of the WRR findings were published in the Dutch language this summary is intended to provide readers outside the Netherlands with an insight into the issues at stake and the solutions suggested by the WRR

### Personal Connections in the Digital Age

Nancy K. Baym, 2015-08-04 The internet and the mobile phone have disrupted many of our conventional understandings of ourselves and our relationships raising anxieties and hopes about their effects on our lives In this second edition of her timely and vibrant book Nancy Baym provides frameworks for thinking critically about the roles of digital media in personal relationships Rather than providing exuberant accounts or cautionary tales it offers a data grounded primer on how to make sense of these important changes in relational life Fully updated to reflect new developments in technology and digital scholarship the book identifies the core relational issues these media disturb and shows how our talk about them echoes historical discussions about earlier communication technologies Chapters explore how we use mediated language and nonverbal behavior to develop and maintain communities social networks and new relationships and to maintain existing

relationships in our everyday lives The book combines research findings with lively examples to address questions such as Can mediated interaction be warm and personal Are people honest about themselves online Can relationships that start online work Do digital media damage the other relationships in our lives Throughout the book argues that these questions must be answered with firm understandings of media qualities and the social and personal contexts in which they are developed and used This new edition of Personal Connections in the Digital Age will be required reading for all students and scholars of media communication studies and sociology as well as all those who want a richer understanding of digital media and everyday life
