**Psychical Review** ,1893      **The Security of Self** Emily B. Laidlaw, Florian Martin-Bariteau, 2025-11-25 Cybersecurity is a powerful concept often examined through the lens of national security and organizational risks. It however demands a deeper understanding to empower our societies and ourselves to thrive in the digital context. This edited collection explores a new approach to human centric cybersecurity: the security of self. It invites a paradigm shift where cybersecurity's core purpose is to protect people and society from harm and where empowering individual and collective rights defines what it means to provide a secure cyber environment. With a distinct Canadian focus and case studies spanning the Internet of Things, artificial intelligence, virtual reality and social media, this collection charts a path forward for cybersecurity grounded in law, policy and practices that advance the security of self. This collection serves as a valuable resource for researchers, policymakers, regulators and individuals seeking to understand and shape the future of human centric cybersecurity. **The**
