**Connecting People to Their Oceans: Issues and Options for Effective Ocean Literacy** Angel Borja, Francesca Santoro, Gail Scowcroft, Stephen Fletcher, Pierre Strosser, 2020-03-25 While there is growing evidence of the importance of marine ecosystems for our societies, evidence shows also that pressures from human activities on these ecosystems are increasing, putting the health of marine ecosystems at stake worldwide. Hence, Blue Economy is becoming an important component of future socio-economic development strategies. e.g., this is called Blue Growth in Europe that eventually can result in increasing pressures at sea and, despite the current regulatory framework in particular with the Oceans Act in USA or Canada and the Marine Strategy Framework Directive in Europe, it is likely that this situation will continue in the future. Ensuring all those connected to the sea directly or indirectly gain a better understanding of the importance of the seas, the human-sea interactions and opportunities to act better and reduce impacts from human pressures is central to Ocean Literacy (OL). Receiving increasing attention in Europe and USA, OL is a challenge for all parts of society: educators, 2 the role OL could play in interaction with innovation, regulation, economic incentive, social norms to support human capital development as key component of sustainable growth and 3 pre-conditions for effective OL for different sectors and target groups. Questions relevant to OL include: Which knowledge produced by whom to share and how? Who to target and how to effectively reach those targeted? How to design OL initiatives including by mobilizing those targeted via living lab approaches e.g. to ensure effective OL and pave the way for behavior change? What are the knowledge gaps that limit our capacity to design effective OL? As scientists, it is likely you have many more questions to offer and discuss.

*Hubris Maximus* Faiz Siddiqui, 2025-04-22 The rise, fall and revival of the Caesar of Silicon Valley, Elon Musk, famously leads his companies from a bully pulpit cutting through red tape whenever possible with little regard for the fallout. Musk's approach to business and politics is truly singular: he alternately seems to be either in complete command or on the verge of a meltdown, and many in his orbit have had their lives upended by buying into his utopian vision. From the chaotic launch of the Tesla Cybertruck to his decision to reshape Twitter into X as part of his self-proclaimed mission to defeat the woke mind-virus, Musk is seemingly drawn to public controversy yet he has emerged from these turbulent moments more influential and

powerful than ever Hubris Maximus offers an unprecedented insight into the motives and mindset that have driven Musk s stratospheric rise to power In this cautionary tale about the pitfalls of magnetic leaders Washington Post journalist Faiz Siddiqui offers a gripping portrait of a uniquely messy and lucrative period in Musk s career one which has seen him ascend into a key role in Trump s administration

have suggested that these uprisings were significantly influenced and organised by Twitter and subsequently referred to them as Twitter Revolution Other authors have strongly opposed this idea and attributed it to self deception in the light of marvellous inventions of the Western World They have suggested Twitter was predominantly used as an information sharing network In an effort to contribute data to this debate this dissertation analyses tweet content from three different observation periods two tweet datasets were collected from other academics and third one was crawled from the Twitter API this process made use of the crawling tool cURL and the database software mongoDB The combined tweet dataset contained about 1 9 million tweets out of which a sample of 1945 tweets was drawn This sample was then evaluated in a quantitative content analysis according to a coding manual These codes were entered into the statistical analysis software SPSS in which they were also processed This study found that in the context of these uprisings Twitter was indeed used more as an information sharing tool and only to a relatively small fraction for organisational purposes This result does not negate the possibility of a mobilising effect of that small fraction A further central result is that almost every second tweet contained a hyperlink and that most of these lead to visual stimuli
