Psychiatric Nursing Norman L. Keltner, Lee Hilyard Schwecke, Carol E. Bostrom, 2002. Featuring a clear writing style and a reader friendly approach this popular resource focuses on the therapeutic skills expected of the psychiatric nurse. Using the psychotherapeutic management model as a framework it takes a practical clinical approach to nursing by integrating clinical realities with the theory taught in nursing schools emphasizing those duties for which nurses are primarily responsible. This fourth edition features a new full color design patient education content and expanded student worksheets with case studies and critical thinking questions making it an even more effective learning tool. A separate unit on the continuum of care discusses care settings and case management. An entire unit on pharmacology includes drug side effects and nursing interventions. Each chapter begins with learning objectives to point students to important concepts within. Key terms are presented where appropriate in a boxed format for easy reference to facilitate the understanding of chapter content. Case studies help the reader conceptualize the development of effective nursing care strategies. Family Issues boxes are included in selected chapters to facilitate awareness of the issues families must confront when a member suffers from mental illness. Clinical examples drawn from the authors own experiences are interspersed throughout the text to provide realistic illustrations of specific content. All boxes and tables with pharmacology content are highlighted for emphasis and accessibility. Nursing care plans highlight nursing care for selected disorders. Critical thinking questions throughout the text expand clinical reasoning skills. Key concepts are listed at the end of each chapter to recap important content. Key terms are defined in a comprehensive glossary in the back of the book. A new chapter on Alternative and Complementary Therapies presents valuable information about the various alternative complementary therapies associated with mental health and illness. A new chapter on Spirituality addresses how spiritual beliefs can affect patients and their treatment. The new full color design is more reader friendly and accessible. Patient and Family Education boxes in selected disorders chapters highlight important information. Updated DSM IV TR content is included. An expanded student study guide in the back of the book features perforated worksheets, multiple choice study questions, case studies and critical thinking questions to facilitate comprehension of the content. The purpose of this book is to carefully explain to therapists who may have little or no experience with hypnosis a simple therapeutic solution to anxiety and panic that often cures patients. My method works by addressing the answer to HOW we become anxious the mechanisms that always exist and not WHY we become anxious or WHAT makes us anxious. It is different than other methods because it essentially forgoes much if any history taking which many patients enjoy as it so unexpected and different from any other therapists before. It focuses on the patient feeling understood rather than heard. Using this unorthodox method can transform your practice by quickly curing and relieving anxiety and panic in many patients. The book begins on the opening page with a joke but the joke is a powerful metaphor for my philosophical approach to therapy. The book conveys the cadence and rhythm for delivery and the precise words and meticulous reasons for my words. This book lets you understand the importance of precise language in order to generate hope and expectancy from the very first moments to ensure that the patient returns WORDS OF PRAISE. Dr McCarthy a Scottish New Zealander a seasoned medical hypnotist has written a very original and easy reading book about treating anxiety based on his extensive experience helping such patients. It's filled with humour, humility and creativity with original new ways to design metaphors and hypnotic stories within the brief therapy tradition. I enjoyed reading it and found new and interesting applications for my everyday practice. A book for therapists worth reading and above all using. Dr Gérard Fitoussi President elect European Society of Hypnosis President Confédération Francophone d'Hypnose et de Thérapies Brèves. Dr Pat is an internationally renowned medical hypnotist. In this book he presents a formula for curing anxiety in five sessions. His approach is step by step and emphasizes the paramount importance of the first session. It is full of stunning metaphors and powerful scripts. This book will change and enhance your practice forever. Don't just provide temporary anxiety relief cure it. Dr Gayle Christie President Australian Society of Hypnosis. A collection of metaphors and stories presented with humor and compassion. The McCarthy Methods are a basic easy to use series of steps to ease overwhelming symptoms of anxiety. It is an accessible text for those interested in a conversational style of clinical hypnosis dotted with gems of wisdom. Julie Linden Past President of the International Society of Hypnosis ISH the American Society of Clinical Hypnosis ASCH and of the Greater Philadelphia Society of Hypnosis GPSCH. I warmly recommend this book to all hypnotherapists. Dr Pat McCarthy an experienced hypnotherapist proposes a new creative and
