## Nfl Schedule Today:

*Pro Football Schedules* Ivan Urena, 2013-12-25 This book explains how the NFL determines each team's opponents and how the league's scheduling format has evolved throughout the years. It includes a history on the evolution of the pro football schedule, explores all of the scheduling formulas used in the National Football League, American Football League and the All America Football Conference and presents home and away opponent charts from 1933 through the 2017 season.

**Television Today and Tomorrow** Gene F. Jankowski, David C. Fuchs, 1996-11-21 In recent years the media has been awash in exuberant tales of the arrival of the information superhighway when television will explode with exciting possibilities offering some 500 channels as well as a marriage of TV and computer that will provide on command access to the latest movies magazines newspapers books sports events stock exchange figures your bank account and much much more. And the major TV networks' pundits add will be doomed to extinction by this revolution in cable computers and fiber optics. But in *Television Today and Tomorrow* Gene Jankowski former President and Chairman of the CBS Broadcast Group and David Fuchs also a former top executive at CBS tell a different story. They predict a bumpy road ahead for the information superhighway and the major networks they say are abundantly healthy and will remain so well into the next century. The information superhighway Jankowski and Fuchs admit will dramatically increase the distribution channels but it will have little impact on the amount of programming created and this may spell disaster. The authors show how the networks began as a way to provide programs to local stations who could not afford to produce their own who in turn provided the distribution that gave networks access to mass audiences and ultimately large advertising dollars. They then offer us an inside look at television production showing us for instance a veteran scriptwriter putting together a breakfast table scene for *Cloud Nine* to underscore how much effort goes into producing just two minutes of primetime programming. They reveal that the present 20 channels require some 20 000 hours of programming each year which is more than all the Broadway plays produced in this century and they conclude that without a dramatic increase in programming which won't happen if only because of the very finite supply of talent the superhighway will be jammed bumper to bumper with reruns old movies and inexpensive programming aimed at tightly focused audiences narrowcasting as opposed to broadcasting. This is hardly the bonanza the pundits have promised. The authors point out that the media blitz about the new technology has hardly focused on programming or on funding or on what needs these 500 channels will fill. The major networks on the other hand will remain the only means of reaching the whole country and the only channels that offer a full schedule of current live and original programs free of charge. And thus they will continue to attract most of the audience of TV viewers. The real loser in the cable revolution the authors contend is PBS whose role as an alternative to network TV has been usurped by cable stations such as The Discovery Channel and Nickelodeon. This is a brass tacks look at television with an eye on the bottom line by two men who boast over sixty years of experience in the medium. If you want to understand television in America
