Machines powered by artificial intelligence are good at some things playing chess but not others life and death decisions or anything involving uncertainty Gigerenzer explains why algorithms often fail at finding us romantic partners love is not chess why self driving cars fall prey to the Russian Tank Fallacy and how judges and police rely increasingly on nontransparent black box algorithms to predict whether a criminal defendant will reoffend or show up in court He invokes Black Mirror considers the privacy paradox people want privacy but give their data away and explains that social media get us hooked by programming intermittent reinforcement in the form of the like button We shouldn't trust smart technology unconditionally Gigerenzer tells us but we shouldn't fear it unthinkingly either      **Manual for Rifle Practice** George Wood Wingate, 1878
