About the MEMS Reference Shelf: The MEMS Reference Shelf is a series devoted to Micro Electro Mechanical Systems (MEMS) which combine mechanical, optical, or fluidic elements on a common microfabricated substrate to create sensors, actuators, and microsystems. This series strives to provide a framework where basic principles, known methodologies, and new applications are integrated in a coherent and consistent manner. STEPHEN D. SENTURIA, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, PROFESSOR OF ELECTRICAL ENGINEERING, EMERITUS. *MEMS Vibratory Gyroscopes* Cenk Acar, Andrei Shkel, 2008-12-16

MEMS Vibratory Gyroscopes provides a solid foundation in the theory and fundamental operational principles of micromachined vibratory rate gyroscopes and introduces structural designs that provide inherent robustness against structural and environmental variations. In the first part, the dynamics of the vibratory gyroscope sensing element is developed; common micro fabrication processes and methods commonly used in inertial sensor production are summarized; design of mechanical structures for both linear and torsional gyroscopes are presented; and electrical actuation and detection methods are discussed along with details on experimental characterization of MEMS gyroscopes. In the second part, design concepts that improve robustness of the micromachined sensing element are introduced, supported by constructive computational examples and experimental results illustrating the material. **Photonic Microsystems** Olav Solgaard, 2009-04-05

This book describes Microelectromechanical systems (MEMS) technology and demonstrates how MEMS allow miniaturization, parallel fabrication, and efficient packaging of optics, as well as integration of optics and electronics. The book shows how the characteristics of MEMS enable practical implementations of a variety of applications including projection displays, fiber switches, interferometers, and spectrometers. The authors conclude with an up to date discussion of the need for the combination of MEMS and Photonic crystals.
