Migration The Biology Of Life On The Move:

Migration : The Biology of Life on the Move Davis Hugh Dingle Professor in the Department of Entomology and Center for Population Biology University of California, 1996-01-18 Migration is one of the most fascinating and dramatic of all animal behaviors Historically however the study of migration has been fragmented with ornithologists entomologists and marine biologists paying little attention to work outside their own fields This treatment of the subject shows how comparisons across taxa can in fact illuminate migratory life cycles and the relation of migration to other movements The book thus takes an integrated ecological perspective focusing on migration as a biological phenomenon The work is divided into four parts each with a brief introductory section Part I defines migration gives examples and places migration in the spectrum of movement behaviors concluding with a chapter on methods for its study Part II focuses on proximate mechanisms including physiology and morphology and the constraints associated with them the interactions between migration and wind and current patterns and the various orientation and navigation mechanisms by which migrants find their way about Part III on the evolution of migratory life histories addresses the evolutionary and ecological basis for migration and the roles of migration not only in the lives of organisms but also in the ecological communities in which they live Part IV is devoted to a brief consideration of migration and its relation to pest management and conservation As a major contribution to a vital subject this work will be valued by all researchers and students in the field of animal behavior ecology and zoology

Migration Hugh Dingle, 2014-07-17 Migration broadly defined as directional movement to take advantage of spatially distributed resources is a dramatic behaviour and an important component of many life histories that can contribute to the fundamental structuring of ecosystems In recent years our understanding of migration has advanced radically with respect to both new data and conceptual understanding It is now almost twenty years since publication of the first edition and an authoritative and up to date sequel that provides a taxonomically comprehensive overview of the latest research is therefore timely The emphasis throughout this advanced textbook is on the definition and description of migratory behaviour its ecological outcomes for individuals populations and communities and how these outcomes lead to natural selection acting on the behaviour to cause its evolution It takes a truly integrative approach showing how comparisons across a diversity of organisms and biological disciplines can illuminate migratory life cycles their evolution and the relation of migration to other movements Migration The Biology of Life on the Move focuses on migration as a behavioural phenomenon with important ecological consequences for organisms as diverse as aphids butterflies birds and whales It is suitable for senior undergraduate and graduate level students taking courses in behaviour spatial ecology movement ecology and conservation It will also be of interest and use to a broader audience of professional ecologists and behaviourists seeking an authoritative overview of this rapidly expanding field

Migration in Christianity. Events of Migration in the New Testament Emmanuel Wayi,2016-11-04 Essay from the year 2016 in the subject Theology Miscellaneous course Private Research language English abstract As a participant of the course People and faiths on the move at the Ecumenical Institute Bossey in July 2016 the author of this paper was inspired by the message of the course which focused on migration to write down this perspective on migration within Christianity with focus on the time of the New Testament and particularly just before and immediately after the life of Jesus Christ In looking at the issue of how people have moved from place to place over the years in search of either a means of survival or a god this theme anchors strongly on how we can better view some religious experiences of today It can be seen clearly that there is surely no one faith that does not have in its structure some issues regarding migration It is either some members of the faith or some items that had been forced to leave or willingly left a certain place to another for some reasons It is worth noting that the way we will treat the issue of migration here may remain unsatisfactory to others since this paper will also dare into the spiritual dimension of migration Migration therefore would be viewed here bearing in mind the three angles being internal external and spiritual migrations This paper does not desire to view Migration only as a movement from one country to the other but also as a movement within the same national territory and as involving both physical movement and spiritual journeys too In this way it would be clearer to see certain features of migration in the New Testament This paper also tries to highlight some aspects of migration in the remaining two Abrahamic faiths Islam and Judaism which means that the focus will be on Christianity and allusions will be made to Islam and Judaism Judaism and Christianity have a lot common on the issue which will be discussed already at the beginning of this paper Islam will be examined very briefly at the end It must be emphasized here that the various topics chosen are open to critical discussion for the purpose of achieving a better result Take some time to read this work and make constructive criticism so that academic work can triumph Tree Of Life 5 No Author,2020-10-10 Tree of Life is an engaging and innovative course on Environmental Studies for classes 1 to 5 The series is based on the vision of the National Curriculum Framework and adopts a multidisciplinary approach to enable holistic learning Effectively graded learner centric content integrates environmental issues with life skills and sensitizes learners towards sustainability of the environment *Population Redistribution in the Midwest* Curtis C.
