Students' Experiences of Psychosocial Problems in Higher Education Trine Wulf-Andersen, Lene Larsen, Annie Aarup Jensen, Lone Krogh, Aske Basselbjerg Stigemo, Mathias Hulgård Kristiansen, 2022-08-19 Around the world students in higher education suffer from and deal with psychosocial problems. This phenomenon is universal and seems to be increasing. A vast number of students enter higher education with problems like stress, anxiety or depression or develop them during their student lives due to, for example, loneliness, family crisis, mental health or study environment issues. Battling belonging and recognition are the focal points of this book's analyses showing how students faced with psychosocial problems experience high degrees of stigma and exclusion in the academic communities and society as such. The book is based on research situated in a welfare society Denmark where students have relatively easy access to higher education and to public support for education as well as special support for students with psychosocial problems. Taking a student perspective the book provides in-depth qualitative analyses of what characterizes student life which specific psychosocial and other problems students experience, how problems are constructed, represented and become significant in relation to studying and, not least, how students deal with them. It will be of great interest to researchers, academics and postgraduate students in the fields of educational psychology, sociology of education and higher education. It will also be of interest to supervisors and administrators in higher education
