emperor s favorite authors And with them the key to understanding his mind *Christianity in Egypt* Michael Parker,2026-02-26 Drawing on primary sources as well as imminent scholars in the field Parker has written a history of Christianity in Egypt that is scholarly and accessible It challenges the common assumption that Egyptian Christianity is backward and irrelevant Rather as Parker writes in the preface the history of Egyptian Christianity presented in the pages to follow is of a people who enjoyed a brilliant golden age suffered a long era of heartbreaking debilitation and have now entered a period potentially breathtaking revival It is a story worthy in its own right but also inspiring and instructive for the global church The Rise of Science in Islam and the West John W. Livingston,2017-12-14 This is a study of science in Muslim society from its rise in the 8th century to the efforts of 19th century Muslim thinkers and reformers to regain the lost ethos that had given birth to the rich scientific heritage of earlier Muslim civilization The volume is organized in four parts the rise of science in Muslim society in its historical setting of political and intellectual expansion the Muslim creative achievement and original discoveries proponents and opponents of science in a religiously oriented society and finally the complex factors that account for the end of the 500 year Muslim renaissance The book brings together and treats in depth using primary and secondary sources in Arabic Turkish and European languages subjects that are lightly and uncritically brushed over in non specialized literature such as the question of what can be considered to be purely original scientific advancement in Muslim civilization over and above what was inherited from the Greco Syriac and Indian traditions what was the place of science in a religious society and the question of the curious demise of the Muslim scientific renaissance after centuries of creativity The book also interprets the history of the rise achievement and decline of scientific study in light of the religious temper and of the political and socio economic vicissitudes across Islamdom for over a millennium and integrates the Muslim legacy with the history of Latin European accomplishments It sets the stage for the next momentous transmission of science from the West back to the Arabic speaking world of Islam from the last half of the 19th century to the early 21st century the subject of a second volume Hegel's Interpretation of the Religions of the World Jon Stewart,2018-09-12 In his Lectures on the Philosophy of Religion Hegel treats the religions of the world under the rubric the determinate religion This is a part of his corpus that has traditionally been neglected since scholars have struggled to understand what philosophical work it is supposed to do In Hegel s Interpretation of the Religions of the World Jon Stewart argues that Hegel s rich analyses of Buddhism Hinduism Zoroastrianism Judaism Egyptian and Greek polytheism and the Roman religion are not simply irrelevant historical material as is often thought Instead they play a central role in Hegel s argument for what he regards as the truth of Christianity Hegel believes that the different conceptions of the gods in the world religions are reflections of individual peoples at specific periods in history These conceptions might at first glance appear random and chaotic but there is Hegel claims a discernible logic in them Simultaneously a theory of mythology history and philosophical anthropology Hegel s account of the world religions goes far beyond the field of philosophy of

religion The controversial issues surrounding his treatment of the non European religions are still very much with us today and make his account of religion an issue of continued topicality in the academic landscape of the twenty first century

Braille Book Review ,2009-05 *Science News* ,2008 Recasting the Past Derek R. Peterson,Giacomo

Macola,2009-09-15 The study of intellectual history in Africa is in its infancy We know very little about what Africa s thinkers made of their times Recasting the Past brings one field of intellectual endeavor into view The book takes its place alongside a small but growing literature that highlights how in autobiographies historical writing fiction and other literary genres African writers intervened creatively in their political world The past has already been worked over by the African interpreters that the present volume brings into view African brokers pastors journalists kingmakers religious dissidents politicians entrepreneurs all have been doing research conducting interviews reading archives and presenting their results to critical audiences Their scholarly work makes it impossible to think of African history as an inert entity awaiting the attention of professional historians Professionals take their place in a broader field of interpretation where Africans are already reifying editing and representing the past The essays collected in Recasting the Past study the warp and weft of Africa s homespun historical work Contributors trace the strands of discourse from which historical entrepreneurs drew highlighting the sources of inspiration and reference that enlivened their work By illuminating the conventions of the past Africa s history writers set their contemporary constituents on a path toward a particular future History writing was a means by which entrepreneurs conjured up constituencies claimed legitimate authority and mobilized people around a cause By illuminating the spheres of debate in which Africa s own scholars participated Recasting the Past repositions the practice of modern history
