of the health care provider and supportive clinicians The book is written specifically for a medication aide course or training for unlicensed direct care staff working in community settings such as those providing direct care for individuals with mental health and developmental disabilities nursing assisting long term care facilities nursing homes residential care homes assisted living facilities home care hospice full time residential programs public and private schools and physician s offices or practices In addition the book offers licensed individuals a thorough review of basic medication administration skills and serves as an excellent reference manual for licensed staff It offers ongoing support to a facility s established medication policies and procedures and serves as the foundation to a strong nursing curriculum All the materials are prepared in the form of questions and answers

Basic Medication Administration Skills Lena L. Deter,2006 Basic Medication Administration Skills provides unlicensed assistive personnel with the basic knowledge and skills needed to perform medication administration safely and effectively under the clinical direction of the health care provider and supportive clinicians The book is written specifically for a medication aide course or training for unlicensed direct care staff working in community settings such as those providing direct care for individuals with mental health and developmental disabilities nursing assisting long term care facilities nursing homes residential care homes assisted living facilities home care hospice full time residential programs public and private schools and physician s offices or practices

Clayton's Basic Pharmacology for Nurses Michelle Willhnganz, Samuel L. Gurevitz, Bruce D. Clayton, 2019-03 Master the basic principles of pharmacology and safe medication administration with Clayton s Basic Pharmacology for Nurses 18th Edition Known for its impeccably accurate and up to date drug content this best selling text consistently underscores medication safety as it guides you in applying pharmacology information to the nursing process Introductory units acquaint you with the basic principles of pharmacology and medication administration while subsequent body system units prepare you to apply the nursing process to every major disorder Clear guidelines cover safe drug handling the types of drugs used for disorders or to affect body systems injection and enteral administration and patient education From a respected author team this full color text also provides an excellent review for the pharmacology questions on the NCLEX examination Medication safety is underscored through Medication Safety Alerts and Clinical Pitfall boxes as well as Do Not Confuse and High Alert icons Unit on medication administration clearly and visually outlines assessment techniques procedures and documentation for safe administration of percutaneous enteral and parenteral drugs Application of the nursing process offers an overview of general principles of nursing care for each disorder as well as specific nursing considerations for the drug treatment Lifespan Considerations boxes for children and for older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups Drug tables clearly outline generic and brand names availability and dosage ranges for key medications for each disorder Clinical Goldmine boxes focus on best practices in the clinical setting Get Ready for the NCLEX Examination section at the end of each chapter covers key points from the chapter as well as

review questions to help prepare for course assessments and the NCLEX Examination Video clips on medication administration procedures provide a visual reference for safe medication administration Key terms with phonetic pronunciations and text page references are listed at the beginning of each chapter NEW Chapter on Neurodegenerative Disorders covers drugs for dementia and Alzheimer's Disease NEW Updated guidelines on diabetes heart failure asthma COPD and cancer ensure readers are versed in the latest treatment protocols NEW Accurate and up to date coverage includes the most recent FDA approvals withdrawals therapeutic uses and content on cultural considerations related to each drug class

Introduction to Clinical Pharmacology Marilyn Winterton Edmunds, 2012-01-26 This is a Pageburst digital textbook Edmunds helps you understand how drugs and drug classes work rather than simply memorizing information about individual drugs This book emphasizes the principles of safe drug administration including coverage of math review and drug dosage calculation It also covers must know drugs the ones you'll see most often in clinical practice A Companion CD includes Animations Video Clips interactive Drug Dosage Calculators an Audio Glossary and an expanded collection of Review Questions for the NCLEX PN Examination A focus on understanding drug classes rather than memorizing individual drugs helps you understand the actions and uses of drug classes and provides a framework for safe effective practice as new drugs are introduced and as existing drugs are withdrawn from the market Full color design includes 195 drawings and photographs Coverage of math review and medication administration includes three chapters on math review and drug dosage calculation to promote safe drug administration Consistent chapter format covers each drug class in a practical format including Action Uses Adverse Reactions Drug and Food Interactions and Nursing Implications and Patient Teaching sections Application of the nursing process to each drug class includes Assessment Diagnosis Planning Implementation Evaluation and Patient and Family Teaching Key content is highlighted as in all of Elsevier's LPN Threads textbooks with features such as Memory Joggers Clinical Goldmines Clinical Landmines Pediatric Considerations and Complementary and Alternative Therapies boxes Case Studies in all drug chapters offer practice in applying information to realistic clinical situations and help you prepare for the NCLEX PN Examination Drug Calculation Review questions reinforce your drug calculation and math skills in the context of clinical practice Critical Thinking Questions at the end of each chapter promote higher level thinking skills while reinforcing key concepts Glossary includes all of the book's Key Terms plus additional terminology that will be helpful in clinical practice with audio pronunciations on the Companion CD and Evolve website Improved readability and clarity make the content easier than ever to learn Unique 30 must know drugs those most commonly prescribed are highlighted with icons and listed inside the back cover for quick reference Do Not Confuse Drug List located inside the back cover for quick reference helps you avoid drug errors with common look alike sound alike drug names Pharmacology and the Nursing Process in LPN LVN Practice chapter focuses on today's LPN LVN practice environment including the increased levels of responsibility increasing resource constraints and common cultural

misunderstandings Coverage of patient teaching and cultural awareness now emphasizes pharmacology rather than disease processes relating patient teaching health literacy and lifespan and cultural considerations to drug administration Updated diabetes coverage reflects the latest developments in drug therapy for patients with diabetes mellitus Coverage of obesity management is expanded to reflect the national emphasis on reducing obesity in favor of healthy lifestyles that reduce the risk of diabetes heart disease and related lifestyle diseases Expanded coverage of drug resistant infections includes MRSA and other drug resistant organisms Integrated Video Clips and Animations on the Companion CD and Evolve website are now highlighted in the margins of the book Geriatric Considerations boxes are expanded and updated to better identify special considerations in drug therapy for older adults *RN Dianne Saunders (nurse.), Lynne Hall, 2002*
