Value Sets for EQ-5D-5L Nancy Devlin, Bram Roudijk, Kristina Ludwig, 2022-03-23 This open access book provides an essential guide to value sets for anyone working with EQ 5D 5L data. The EQ 5D 5L is one of the most widely used health related quality of life questionnaires around the world with applications in clinical trials, population health surveys and routine outcomes measurement. In addition to providing a concise generic way of describing health, the EQ 5D 5L facilitates the valuation of health and health improvements through its value sets which play a pivotal role in Health Technology Assessment across the world. Value sets for the EQ 5D 5L have been produced in a wide range of countries and regions using a standardised international protocol developed by the EuroQol Group. This book brings together for the first time a comprehensive inventory of these value sets and a comparative review of their characteristics. In addition to the structured summaries of each value set, the book provides clear guidance to users and researchers on how to choose which value set to use for what purpose. It also provides information about the methods that were used to produce these values, how these methods have been refined and how they may evolve in future. The book is the culmination of a substantial programme of work internationally. By collating these value sets into a single volume, the book aims to provide an easy to use resource which is likely to become a key reference source for EQ 5D 5L users and researchers.

The Comparative Guide to American Suburbs David Garoogian, 2009 The Comparative Guide to American Suburbs is a one stop source for Statistics on the 2 000 suburban communities surrounding the 50 largest metropolitan areas their population characteristics, income levels, economy, school systems and important data on how they compare to one another. Organized into 60 Metropolitan Area chapters, each chapter contains Overview of the Metropolitan Area, Detailed Map, Statistical Profile of each Suburban Community, Contact Information, Physical Characteristics, Population Characteristics, Income, Economy, Unemployment Rate, Cost of Living, Education, Chambers of Commerce and much more. Next, statistical data is sorted into Ranking Tables that rank the suburbs by twenty different criteria including Population, Per Capita Income, Unemployment Rate, Crime Rate, Cost of living and more. These useful, easy to read tables allow for quick and easy comparisons between suburbs. The Comparative Guide to American Suburbs is the best source for locating data on suburbs. Towards a Cognitivist Understanding of Communication Design Phil Jones, 2024-06-12 This book demonstrates the relevance and importance of cognitive linguistics when applied to the analysis and practice of graphic design communication design. Phil Jones brings together a diverse range of theory and organizes it in accordance with different stages in the design process. Using examples from contemporary communication design as well as more familiar selections from the graphic design canon as case studies, this book provides an account of how meanings are made by users and suggests new strategies for design practice. It seeks convergences between the ways that graphic communication designers think and talk about their practice and the theories emerging from cognitive science.
