**BOOK JACKET** **Founders of American Industrial Design** Carroll Gantz, 2014-07-17 As the Great Depression started in 1929 several dozen creative individuals from a variety of artistic fields including theatre, advertising, graphics, fashion and furniture design pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age to introduce modern design to the external appearance and form of mass-produced functional mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers which helped the economy to recover. Established a new profession, industrial design, and within a decade changed American products from mechanical monstrosities into sleek modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50 000 practitioners.
