witnessed an increasing use of sophisticated graphics in designing and manufacturing complex architectural and engineering
systems in modeling simulating and visualizing complicated physical processes in generating highly realistic images and
animation and in most man machine interfaces These trends are made possible by the improvement in performance and the
lowering of cost of hardware since the mid 1970s and the continuing advances in many areas of computer graphics The major
advances in computer graphics include greater sophistication and realism of image generation techniques improved man
machine interaction techniques superior geometric modeling techniques for the representation and modeling of complex
physical and mathematical objects sophisticated software systems for animation and modeling of incorporating latest AI and
software engineering techniques greater integration of CAD and CAM in CIM and techniques to represent and visualize
complicated physical processes These advances are reflected in this present volume either as papers dealing with one
particular aspect of research or as multifaceted studies involving several different areas Autocar ,2004 **Autocar &**
