This capstone project includes a study of how electronic technology can be integrated into the art classroom to promote student engagement and meaningful art projects What kinds of digital art can students create What are the outcomes of using electronic technology in an art classroom In order to fully understand these research questions I reviewed scholarly literature that focuses on the benefits challenges and creative use of technology in the art classroom In my action research study I used a backward design approach to create a digital art curriculum unit for my middle school students During the unit my students used a variety of electronic technology and apps to create three digital art projects Some of my findings were expected but still interesting while others were unanticipated My students were generally interested in using electronic technology during the art making process and were well behaved during the digital art unit I was also surprised to see how impressed and supportive my school administrators were of the digital art unit My last finding was that students began to feel more comfortable and understanding of electronic technology towards the end of the digital art unit The results of my research including lesson plans PowerPoint presentations photographs of students digital art work and assessment strategies are available on my website at http://www.hollyberndt.com/digital_art.html
