Daigle,Tom T. Hartley,Stephen P. Chicatelli,1989-11-20 This research monograph gives a complete discussion of the theory of the discrete time hyperbolic map Both scalar and matrix representations are considered The dynamics of the map are analyzed and discussions of stability

quasiperiodicity and chaos are included. Several applications are discussed, the most important being the discrete time linear time invariant quadratic regulator. The results obtained from this analysis are then extended to the continuous time linear regulator. A discussion of the linear quadratic regulator with negative state weighting provides some important insights into the general regulator theory. The results contained in this monograph should be accessible to the first year graduate student or advanced senior undergraduate. Interested readers should also have a background in ODEs, difference equations, optimization theory and/or digital control theory. *Report of the ...
