

# MISSING SUBTRAHENDS

Sometimes, a number sentence or word problem only gives us one part and the whole. This means that the other part is missing and we have to solve to find the missing part!

$$\begin{array}{ccccc} 12 & - & ? & = & 8 \\ \uparrow & & \uparrow & & \uparrow \\ \text{minuend} & & \text{subtrahend} & & \text{difference} \\ \text{(whole)} & & \text{(part)} & & \text{(part)} \end{array}$$

How can I find the missing part (the subtrahend)?

<b>flip the fact</b> $12 - ? = 8$ $12 - 8 = ?$	<b>use counters</b>  I circled the number I knew. How many are left? $12 - ? = 8$
<b>model</b>  $12 - ? = 8$	<b>number line</b>  Count how many hops you made. $12 - ? = 8$

**The Emergence of Mathematical Meaning** Paul Cobb, Heinrich Bauersfeld, 2012-12-06 This book grew out of a five year collaboration between groups of American and German mathematics educators The central issue addressed accounting for the messiness and complexity of mathematics learning and teaching as it occurs in classroom situations The individual chapters are based on the view that psychological and sociological perspectives each tell half of a good story To unify these concepts requires a combined approach that takes individual students mathematical activity seriously while simultaneously seeing their activity as necessarily socially situated Throughout their collaboration the chapter authors shared a single set of video recordings and transcripts made in an American elementary classroom where instruction was generally compatible with recent reform recommendations As a consequence the book is much more than a compendium of loosely related papers The combined approach taken by the authors draws on interactionism and ethnomethodology Thus it constitutes an alternative to Vygotskian and Soviet activity theory approaches The specific topics discussed in individual chapters include small group collaboration and learning the teacher s practice and growth and language discourse and argumentation in the mathematics classroom This collaborative effort is valuable to educators and psychologists interested in situated cognition and the relation between sociocultural processes and individual psychological processes A Collection of Performance Tasks and Rubrics Charlotte Danielson, 1999 A collection of 20 class tested activities corresponding to K 3 math topics
