The Oxford Handbook of the Early Modern Sermon Peter McCullough, Hugh Adlington, Emma Rhatigan, 2011-08-04 Scholarly interest in the early modern sermon has flourished in recent years driven by belated recognition of the crucial importance of preaching to religious cultural and political life in early modern Britain The Oxford Handbook of the Early Modern Sermon is the first book to survey this rich new field for both students and specialists It is divided into sections devoted to sermon composition delivery and reception sermons in Scotland Ireland and Wales English Sermons 1500 1660 and English Sermons 1660 1720 The twenty five original essays it contains represent emerging areas of interest including research on sermons in performance pulpit censorship preaching and ecclesiology women and sermons the social economic and literary history of sermons in manuscript and print and non elite preaching The Handbook also responds to the recently recognised need to extend thinking about the early modern across the watershed of the civil wars and interregnum on both sides of which sermons and preaching remained a potent instrument of religious politics and a literary form of central importance to British culture Complete with appendices of original documents of sermon theory reception and regulation and generously illustrated this is a comprehensive guide to the rhetorical ecclesiastical and historical precepts essential to the study of the early modern sermon in Britain Sermons, with an Essay on the Right Interpretation and Understanding of the Scriptures ... Thomas Arnold, 1874 **Texts and Identities in the Early Middle Ages** Richard Corradini, 2006 For seven years a collaboration between the Institute for Medieval Studies of the Austrian Academy of Sciences and the Universities of Utrecht Cambridge Leeds and Paris I Sorbonne provided the opportunity for young researchers to discuss and coordinate their work The title of the project and of this volume Texts and identities provides the framework for case studies in different fields of early medieval history They include apparently disparate topics such as historiography and hagiography monastic spaces and memories lay and ecclesiastic legislation as well as liturgy and penance Rather than defining a common field of research the meetings from which these papers have emerged derived their coherence from their common methodological framework This approach combines two elements on the one hand emphasis has been laid on the careful analysis of the transmission of texts and of the manuscript evidence on the other research has focused on the problem of identity or rather of processes of identification including the perception of differences between specific social political and religious communities In the combination of these two approaches the extant texts from the early medieval period are not only seen as mere reflections of ethnic social and cultural identities but also as media that gave meaning to social practices and were often intended to inspire guide change or prevent action directly or indirectly The written texts that have been transmitted to us can be seen as part of a cultural effort to shape the present by means of restructuring the past The often discordant voices of medieval authors allow modern historians to grasp something of the multiplicity of the early medieval world and of the disagreements conflicts idiosyncrasies and individual perceptions among the people who lived in that period

Many contributions in this volume propose specific methods for studying changing identities They analyse differences between similar texts over time or specifically changes in texts in the course of their transmission The papers collected in this volume illustrate that texts were integral parts of a world in transformation Congressional Record United States.

Cooper,Andrea Denny-Brown,2016-12-05 The Arma Christi the cluster of objects associated with Christ's Passion was one of the most familiar iconographic devices of European medieval and early modern culture From the weapons used to torment and sacrifice the body of Christ sprang a reliquary tradition that produced active and contemplative devotional practices complex literary narratives intense lyric poems striking visual images and innovative architectural ornament This collection displays the fascinating range of intellectual possibilities generated by representations of these medieval objects and through the interdisciplinary collaboration of its contributors produces a fresh view of the multiple intersections of the spiritual and the material in the Middle Ages and Renaissance It also includes a new and authoritative critical edition of the Middle English Arma Christi poem known as *O Vernicle* that takes account of all twenty surviving manuscripts The book opens with a substantial introduction that surveys previous scholarship and situates the Arma in their historical and aesthetic contexts The ten essays that follow explore representative examples of the instruments of the Passion across a broad swath of history from some of their earliest formulations in late antiquity to their reformulations in early modern Europe Together they offer the first large scale attempt to understand the arma Christi as a unique cultural phenomenon of its own one that resonated across centuries in multiple languages genres and media The collection directs particular attention to this array of implements as an example of the potency afforded material objects in medieval and early modern culture from the glittering nails of the Old English poem *Elene* to the coins of the Middle English poem *Sir Penny* from garments and dice on Irish tomb sculptures to lanterns and ladders in Hieronymus Bosch's panel painting of St Christopher and from the altar of the Sistine Chapel to the printed prayer books of the Reformation
