Read the passage carefully. Identify if the given statements compares (CE) or contrasts (CT) the two characters.

Jen had a best friend whose name was also Jenn but with a double "n." They had beautiful brown eyes and blonde hair. But Jenn had long, wavy hair, while Jen had short, straight hair. They went to the same school and studied in the same class. They enjoyed playing sports together. They both excelled in their artistic talents, with a knack for drawing. One of them had a cat as a pet, while the other had a dog. They had different favorite colors, adding a unique touch to their friendship. They were responsible and often helped each other with homework. Coincidentally, their birthdays were in the same month. They loved their pets very much. Jenn took her cat wherever she went, while Jen's dog was her constant companion. However, tragedy struck when Jen forgot to close her dog's cage one day, and that was the last day she saw her pet. On the other hand, Jenn's cat brought joy to her life, and they played together every night.

*Handbook of Children's Literacy* Terezinha Nunes, Peter Bryant, 2003-12-31 PETER BRYANT TEREZINHA NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children's success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer

**Understanding and Teaching Reading**

**Comprehension** Jane Oakhill, Kate Cain, Carsten Elbro, 2014-08-21 The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children It provides a detailed examination of the

characteristics of children who have reading comprehension difficulties and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question what is comprehension. The authors consider comprehension of different units of language understanding single words sentences and connected prose and outline what readers and listeners have to do to successfully understand an extended text. This book also considers comprehension for different purposes in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability vocabulary knowledge syntactic skills memory and discourse level skills such as the ability to make inferences knowledge about text structure and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills or their precursors in pre readers provides the foundation for reading comprehension development. Areas covered include Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter.

Reading Comprehension Instruction, 1783-1987 H. Alan Robinson, 1989 This book examines the methods materials outcomes and technologies of past literacy practice with special focus on the teaching of reading comprehension. The book presents a study of published texts on reading comprehension instruction in America in the preresearch period 1783-1910 as well as published research reports from 1910 through 1987. The book argues that many of the trends in comprehension instruction can be traced to developments in American psychology and looks at future directions for both the practitioner and the researcher. A review of all the studies focused on reading comprehension instruction discussed in the book and an alphabetical listing by author of each study are included in the appendixes. KEH
