**Human Development and the Data Revolution** Sanna Ojanperä, Eduardo López, Mark Graham, 2025-03-07 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations. Human Development and the Data Revolution explores the uses of large scale data in the contexts of development in particular what techniques data sources and possibilities exist for harnessing large datasets and new online data to address persistent concerns regarding human development inequality exclusion and participation. Employing a global perspective to explore the latest advances at the intersection of big data analysis and human development this volume brings together pioneering voices from academia development practice civil society organizations government and the private sector. With a two pronged focus on theoretical and practical research on big data and computational approaches in human development the volume covers such themes as data acquisition data management data mining and statistical analysis network science visual analytics and geographic information systems and discusses them in terms of practical applications in development projects and initiatives. Ethical considerations surrounding these topics are visited throughout highlighting the tradeoffs between benefitting and harming those who are the subjects of these new approaches. The authors explore the potentials of big data analysis for development but also the challenges and limitations for its usefulness in contexts of development illuminating how the measurement and analytical choices made in using big data analysis are far from being neutral or value free considerations.
