PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. **Rock • Paper • Pixels** Patrick Aievoli, 2025-01-20 The purpose of this book is to avail faculty and students of the many different innovations, events, effects, and back stories equated with the advent of this new era of communications and its impact on our world. At our core we are a species that needs to communicate and to find a way to properly represent those messages. Since the beginning of recorded history, mankind has always attempted to communicate and to keep track of its endeavors and accomplishments. Now, by using interaction design and modern digital media, it has become possible to present our story through many current and evocative platforms. As each generation comes of age, this new method is being utilized in all areas of their communication choices. These new generations desire their communication at a different rate than its predecessors. They want their information Internet-ready and interactive. They are involved in the immediate and that choice is not going away. Interactive media is here to stay and has new rules and new effects. It is changing our economies, our societies, and especially us as individuals. The main goal of this book is to help you see how it started, where it is going, and how to be on the right side of this transformation. How to take your first steps in that new direction and how to understand the effects of this new form of communication while being aware of its abilities and its dangers. As a friend once said, no matter how thin you slice it, there are always two sides.

Assessment of Library Collections in a Consortial Environment George Lupone, 2013-09-13 The consortial environment provides librarians with new ways to manage collections at their home institutions. Academic libraries in Ohio have been participating in OhioLINK since 1988 and the consortium has had an effect on shaping local collections for more than one decade. While each institution pursues its own collection management strategy, the shared resources and delivery system provided through OhioLINK influence local collections profoundly. What has been the effect? This work is a collection of articles assessing local collections within a consortial environment. The authors assess collections from their own vantage points, considering such diverse factors as cost, regional depositories, book reviews, and faculty input. The influence of consortial ties in shaping local collections is a common thread throughout the work. This book was published as a special issue of *Collection Management*. **Growth Through Innovation** Roman Boutellier, Mareike Heinzen, 2014-02-10 Capitalism produced entrepreneurs and property rights, the two basic pillars of innovation and growth. As the speed of technology is steadily increasing, only radical innovation can be the name of the game. This book discusses technology and innovation trends by looking into historical examples and telling the latest business stories. It opens the discourse about pirates, pioneers, innovators, and imitators, proposes the framework of dominant science-driven and high-tech industry for innovation management, and gives insights into intellectual property rights, industrial designs, and technical risk management. Finally, it offers 8 important innovation principles for technology-driven enterprises that have turned out to have a big effect on the outcome and, in the end, on growth. **The Routledge**
