*Advanced Artificial Intelligence and Robo-Justice* Georgios I. Zekos, 2022-05-16 The book deals with digital technology which is transforming the landscape of dispute resolution. It illustrates the application of AI in the legal field and shows the future prospect of robo justice for an AAI society in the advanced artificial intelligence era. In other words the present justice system and the influence of current AI upon courts and arbitration are investigated. The transforming role of AI on all legal fields is examined thoroughly by giving answers concerning AI legal personality and liability. The analysis shows that digital technology is generating an ever growing number of disputes and at the same time is challenging the effectiveness and reach of traditional dispute resolution avenues. To that extent the book presents in tandem the impact of AI upon courts and arbitration and reveals the role of AAI in generating a new robo justice system. Finally the end of the perplexing relation of courts and arbitration is evidenced methodically and comprehensively.

The book is the first edited volume dedicated to addressing challenges of constructing safe and secure advanced machine intelligence. The chapters vary in length and technical content, from broad interest opinion essays to highly formalized algorithmic approaches to specific problems.
