Owens,2017 Purpose The long term goal is to improve clinical outcomes for survivors of localized lung cancer NSCLC stages Iu2013IIIa The study objective is to test a tailored intervention Breathe Easier which encompasses meditation varying levels of yoga and breathing exercises to evaluate feasibility and preliminary effects for survivors and family members dyads Background 20% recruitment rate 94% retention rate Survivors mean age 66 years were 44% male and 63% African American Among all participants 74% were not current smokers and 75% completed a 6MWT Family members had greater adherence 76% range 10 49 daily assignments than survivors 65% range 5 48 daily assignments All agreed that course materials were easy to use learning yoga and breathing exercises helped them and that involving a family member was important For each outcome variable dyspnea fatigue perceived stress and sleep quality we assessed whether there was a difference in groups survivors versus partners time T1 versus T2 and the interaction between groups and time Both groups had improved dyspnea fatigue and sleep scores Survivors had greater improvement in dyspnea p 004 fatigue p 0 05 sleep quality p 0 03 and lower perceived stress Discussion Implications Recruitment was low 20% yet not surprising given the isolating nature of lung cancer the uniqueness of this intervention the small volume of survivors of stages I IIIa and the dyadic requirement However retention adherence and acceptability suggest engaged participants Preliminary outcome data indicate that intervention benefits were realized over time by both survivors and family members This pilot study provides evidence that a face to face mindfulness based intervention is feasible with this population of survivors and family members

Ramakrishna Rao, A. C. Paranjpe, Ajit K. Dalal, 2008 Indian psychology is a distinct psychological tradition rooted in the native Indian ethos It manifests in the multitude of practices prevailing in the Indian subcontinent for centuries Unlike the mainstream psychology Indian psychology is not overwhelmingly materialist reductionist in character It goes beyond the conventional third person forms of observation to include the study of first person phenomena such as subjective experience in its various manifestations and associated cognitive phenomena It does not exclude the investigation of extraordinary states of consciousness and exceptional human abilities The quintessence of Indian nature is its synthetic stance that results in a magical bridging of dichotomies such as natural and supernatural secular and sacred and transactional and transcendental The result is a psychology that is practical positive holistic and inclusive The Handbook of Indian Psychology is an attempt to explore the concepts methods and models of psychology systematically from the above perspective The Handbook is the result of the collective efforts of more than thirty leading international scholars with interdisciplinary backgrounds In thirty one chapters the authors depict the nuances of classical Indian thought discuss their relevance to contemporary concerns
