

Comprehensive for the student or professional math basics, medical math calculations, dosage calculations, vital signs, body-related calculations, health care operations, medical specific calculations & nursing skills.

## Basics

### Positive & Negative Numbers

- Positive numbers are greater than 0 (for the right of 0 on a number line) and get larger as you move further away from 0; they may be written with or without a plus sign (+).
- Negative numbers are less than 0 (to the left of 0 on a number line) and get smaller as you move further away from 0; they must be written with a minus sign (-).

### Rules for Addition

- The sum of two positive numbers is a positive number:  

$$\text{Ex: } 5 + 7 = 12$$
- The sum of two negative numbers is a negative number:  

$$\text{Ex: } (-5) + (-7) = -12$$
- The sum of one positive number and one negative number may be positive or negative, depending on which is larger; just remember that adding a negative number is the same as subtracting that number:  

$$\text{Ex: } 10 + (-2) = 10 - 2 = 8, \quad -10 + 2 = -10 - 2 = -12$$

### Rules for Subtraction

- Think of subtraction as addition of the opposite sign. Just change the subtraction sign to a addition sign, and write the opposite of the original number being subtracted and add it to the sum:  

$$\text{Ex: } 5 - 3 = 5 + (-3) = (-3) - (-5) = 5 + 2 = 7$$

### Rules for Multiplication

- The product of two positive numbers is a positive number:  

$$\text{Ex: } 5 \times 6 = 30$$
- The product of two negative numbers is a positive number:  

$$\text{Ex: } (-5) \times (-6) = 30$$
- The product of one positive number and one negative number is a negative number:  

$$\text{Ex: } 5 \times (-6) = -30$$

### Rules for Division

- The quotient of two positive numbers is a positive number:  

$$\text{Ex: } 5 \div 3 = 1.67$$
- The quotient of two negative numbers is a positive number:  

$$\text{Ex: } (-5) \div (-3) = 1.67$$
- The quotient of one positive number and one negative number is a negative number:  

$$\text{Ex: } 5 \div (-3) = -1.67$$

### Distributive Property

- A rule used in multiplication states that  $a(b + c) = ab + ac$ , or that  $a(b - c) = ab - ac$ . In other words, the first term outside the parentheses must be distributed to, or multiplied by, each term inside the parentheses.

Remember to use the rule for multiplying negative and positive numbers if negative numbers are included in the expression:  

$$\text{Ex: } (-5)(-2 + 3) = 5(-2) + 5(3) = -10 + 15 = 5$$

### Fractions

- Fractions represent parts of a whole; they are another way of showing division.
- The top number is called the numerator, and the bottom number is called the denominator.
- There types of fractions:
  - Proper fractions: The numerator is less than the denominator:  $\frac{1}{2}$
  - Improper fractions: The numerator is greater than or equal to the denominator:  $\frac{5}{3}$
  - Mixed numbers: Contains a whole number and a fraction part:  $1\frac{1}{2}$
- lowest terms: Putting a fraction in a form so that the only common factor between the numerator and denominator is 1 (also called reducing a fraction or writing it in reduced form):  

$$\text{Ex: } \frac{5}{10} \rightarrow \text{The numerator and denominator have a common factor of 5, so divide both by 5 to get it in lowest terms: } \frac{1}{2} \rightarrow \text{now their only common factor is 1, so this is lowest terms}$$

RECIPE Fractions that have the same denominator are called equivalent fractions.

### FINDING THE LEAST COMMON DENOMINATOR (LCD)

- The LCD is the smallest number into which both or more denominators will divide evenly; this number is useful for performing operations (especially addition and subtraction) with fractions.

Ex: Given the fractions  $\frac{1}{3}$  and  $\frac{1}{4}$ , what is the LCD?  
 The LCD is the smallest number that is divisible by both 3 and 4; in this case, it is 12, as 12 is a multiple of both the denominators.  
 Denominators by whatever is needed to make each denominator equal to 12:  

$$\frac{1}{3} \times \frac{4}{4} = \frac{4}{12} \text{ and } \frac{1}{4} \times \frac{3}{3} = \frac{3}{12}$$
 The LCD is 12.

### ADDING FRACTIONS

- If the fractions have same denominators:
  - Add the numerators, the denominator stays the same.
  - Write the fraction in reduced form, if necessary.
$$\text{Ex: } \frac{1}{3} + \frac{1}{3} = \frac{2}{3} \text{ since the numerator and denominator are both divisible by 3, reduce the fraction: } \frac{2}{3}$$

- If the fractions have different denominators:
  - Find the LCD and write equivalent fractions for each fraction using the LCD.
  - Add the numerators, the denominator stays the same.
  - Write the fraction in reduced form, if necessary.
$$\text{Ex: } \frac{1}{2} + \frac{1}{3} = \text{the LCD is 6, so rewrite equivalent fractions with a denominator of 6: } \frac{1}{2} = \frac{3}{6}, \frac{1}{3} = \frac{2}{6} \rightarrow \frac{3}{6} + \frac{2}{6} = \frac{5}{6} \text{ now add the numerators: } \frac{5}{6} \rightarrow \frac{5}{6}$$

then it can be reduced by writing as an mixed number:  $\frac{5}{6} = 1\frac{1}{6}$

### SUBTRACTING FRACTIONS

- If the fractions have same denominators:
  - Subtract the numerators, the denominator stays the same.
  - Write the fraction in reduced form, if necessary.
$$\text{Ex: } \frac{5}{6} - \frac{1}{6} = \frac{4}{6} \text{ since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form}$$
- If the fractions have different denominators:
  - Find the LCD and write equivalent fractions for each fraction using the LCD.
  - Subtract the numerators, the denominator stays the same.
  - Write the fraction in reduced form, if necessary.
$$\text{Ex: } \frac{5}{6} - \frac{1}{3} = \text{the LCD is 6, so rewrite equivalent fractions with a denominator of 6: } \frac{5}{6} - \frac{2}{6} = \frac{3}{6} \text{ then subtract the numerators: } \frac{3}{6} \rightarrow \frac{1}{2}$$

since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form

### MULTIPLYING FRACTIONS

- Multiply all numbers between the numerators or mixed numbers to fraction form.
- Multiply the denominators, then multiply the denominators.
- Write the results in fraction form, then write the fraction in reduced form.
$$\text{Ex: } \frac{1}{2} \times \frac{2}{3} = \text{first, write all numbers in fraction form: } \frac{1}{2} \times \frac{2}{3} \rightarrow \text{then multiply the numerators: } 1 \times 2 = 2, \text{ then multiply the denominators: } 2 \times 3 = 6, \text{ and finally reduce: since each number is divisible by 2, divide each by 2: } \frac{2}{6} = \frac{1}{3}$$

### DIVIDING FRACTIONS

- Multiply all numbers between the numerators or mixed numbers to fraction form.
- Change the division sign to multiplication sign.
- Write the reciprocal of the second fraction (reciprocal is one divided by denominator, or flipping the fraction so that the numerator is on the bottom and the denominator is on the top).
- Multiply the numerators, then multiply the denominators.
- Write the results in fraction form, then write the fraction in reduced form.
$$\text{Ex: } \frac{1}{2} \div \frac{1}{3} = \text{the numbers are both already in fraction form, so change the division sign to a multiplication sign and write the reciprocal of the second fraction: } \frac{1}{2} \times \frac{3}{1} = \text{then multiply the numerators: } 1 \times 3 = 3, \text{ multiply the denominators: } 2 \times 1 = 2, \text{ then write the results in fraction form: } \frac{3}{2} = 1\frac{1}{2} \text{ or one and a half.}$$

### CONVERTING FRACTIONS TO DECIMALS

- Write all numbers (numerator and denominator) as fraction form.
- Divide the numerator by the denominator, and add a decimal point after all the digits.
$$\text{Ex: } \frac{1}{3} \rightarrow \text{use it as mixed number, so the 1 is the whole form: } \frac{1}{3} \rightarrow \text{then divide 12 by 3 to get 1.3, since there is nothing to multiply by the left of the decimal point, there is no need to write the decimal point: } 1.3$$

### CONVERTING DECIMALS TO FRACTIONS

- Convert the fraction to a decimal, then multiply by 1000 and add the percent sign (%)
- Round the decimal to the nearest thousandth.
- Multiply by 1000 and add the percent sign (%)
$$\text{Ex: } \frac{1}{3} \rightarrow \text{as a decimal is fraction form: } 0.3333333333 \rightarrow \text{to get 0.3333, there is no need to multiply by 1000 and add the percent sign: } 0.3333$$

### **Nursing Math Quick Study Academic Introduction**

In today's digital age, the availability of Nursing Math Quick Study Academic books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Nursing Math Quick Study Academic books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Nursing Math Quick Study Academic books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Nursing Math Quick Study Academic versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Nursing Math Quick Study Academic books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Nursing Math Quick Study Academic books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Nursing Math Quick Study Academic books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free

access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Nursing Math Quick Study Academic books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Nursing Math Quick Study Academic books and manuals for download and embark on your journey of knowledge?

### FAQs About Nursing Math Quick Study Academic Books

1. Where can I buy Nursing Math Quick Study Academic books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Nursing Math Quick Study Academic book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Nursing Math Quick Study Academic books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing,

and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.

7. What are Nursing Math Quick Study Academic audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Nursing Math Quick Study Academic books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
