**Green Chemistry Strategies for Drug Discovery** Emily A. Peterson,Julie B. Manley,2015-06-30 The incorporation of Green Chemistry is a relatively new phenomenon in the drug discovery discipline since the scale that chemists operate on in drug discovery is smaller than those of process and manufacturing chemistry The necessary metrics are more difficult to obtain in drug discovery due to the diversity of reactions conducted However pharmaceutical companies are realizing that incorporation of green chemistry techniques at earlier stages of drug development can speed the development of a drug candidate Edited by experts who have pioneered green chemistry efforts within their own institutions this book provides a practical guide for both academic and industrial labs wanting to know where to start with introducing greener approaches for greatest return on investment The Editors have taken a comprehensive approach to the topic covering the entire drug discovery process from molecule conception through synthesis formulation and toxicology with specific examples and case studies where green chemistry strategies have been implemented Currently employed as well as emerging techniques for performing greener drug discovery chemistry are addressed as well as cutting edge topics like biologics discovery Moreover important surrounding issues such as intellectual property are included This book will serve as a practical guide for both academic and industrial chemists who work across the breadth of the drug discovery discipline Ultimately readers will learn how to incorporate green chemistry strategies into their everyday workflow without slowing down their science **Study Guide & Solutions Manual to Accompany Organic Chemistry, Third Edition** G.
