Fayyaz Ahmad, Nazir Ahmad Gilkar & Javid Ahmad Darzi, 2008 In order to be effective modern complex organizations require leadership at all levels which is capable of realising the creative potential of

their people towards the attainment of common goals. Organizational Behaviour is a subject based on scientific research and applied orientation, which helps managers and members of organizations to understand, develop and utilize this tremendous human potential. It is now a widely accepted fact that mere possession of technical and administrative skills is not sufficient for leadership success. As such, the managers of the third millennium have started realising that emotions and attitudes of people are as important in determining the organizational success as their technical skills and knowledge. Thus, organizations have started selecting employees based on emotional quotient (EQ) and positive attitudes. The book provides an insight into the subject of organizational behaviour along with cases interweaving them with relevant examples and real happenings. Divided into 15 sections, it covers all the major concepts and principles of management, organization theory and organizational behaviour taking care of both the traditional and transitional viewpoints. It presents cases developed and collected from various sources and follows a student friendly approach. Various concepts in the book have been explained in real Indian perspective to help readers get a practical understanding of the conceptual issues. The book is rich in diagrams, tables and illustrations. The language and style have been kept simple to facilitate easy understanding by the readers. A variety of questions like descriptive, applied orientation and objective type included in the book is one of its distinctive features. This book fulfills the needs of students of MBA, MFC, M Com, BBM, BBA, MHRM, Sociology and Management Studies.

*Organizational Behaviour: Text and Cases, 3rd Edition* Singh Kavita, 2015. The third edition of Organizational Behaviour Text and Cases offers a concise yet comprehensive coverage of the theories that determine behaviour in organizations. The relationship between effective organizational behaviour and the effective functioning of an organization is established through a clear and lucid style of presentation. With the help of necessary concepts, tools and techniques necessary for understanding behaviour in organizations, this book attempts to unfold human behaviour at four levels starting from the individual processes and moving on to the interpersonal, organizational and change processes. It encourages active learning through exercises, field projects and case studies and develops competencies that are essential for becoming successful managers and effective employees in organizations. The three new chapters, Career Planning and Management, Performance and Reward Management and Gender Issues in Management, help readers understand organizational behaviour in the current Indian business scenario better. KEY FEATURES: Classroom tested case studies pertaining to actual incidents from the workplace. Several examples from BPCL, HCL Technologies, Wipro, Infosys and SAP highlighting the best practices in the industry. Caselets focusing on behavioural issues in organizations. Field projects involving students in data collection and analysis. Marginalia summarizing crucial points and serving as quick references. A companion website featuring multiple choice questions, learning objectives, an instructor's manual and PowerPoint lecture slides enabling effective presentation of concepts.
