Lyft Remote Jobs Review:

How We Struggle Sian Lazar, 2023-01-20 A comparative ethnographic approach to the question of labour struggles and workers political agency A masterful book a resource that makes anthropology matter Andrea Muehlebach Professor of Anthropology University of Bremen When it comes to labor movements unionized industrial workers on the factory floor have only ever been part of the picture Across so many different workplaces sectors of the economy and geographical contexts the question of how working people struggle in the day to day has no single answer Here Sian Lazar offers a unique anthropological perspective on labor agency that takes in examples from across the globe from heavy industry and agriculture to the service and informal sectors She asks how do people strive to improve their lives and working conditions How are they constrained and enabled in that struggle by the nature of the work they do and by their own positionality in local histories cultures and networks *How We Struggle* explores worker action across the spectrum from organized trade unionism to individualized strategies of accommodation resistance and escape The book marries a discussion of global political economy and Marxist feminist theories of labor with ethnographic approaches that begin from a perspective of human experience kinship and radical heterogeneity

Employer Perspectives on Employee Work Location

Diane Mulcahy,Tatiana Andreeva,2023 This paper discusses employers experience of working fully remotely during the pandemic and their approaches to returning to the office following the pandemic We chose to focus on the point of view of the employer since it is relatively less explored much more is available and written on the views and opinions of employees about remote work and return to office To understand the employer's perspective we reviewed existing research evidence and carried out eleven structured interviews with corporate leaders about their experiences with remote in office and hybrid work Our literature review suggests that remote work does not have negative effects on performance Similarly the small sample of employers we interviewed experienced very strong company and employee performance while operating their businesses fully remotely All employers we interviewed are implementing a hybrid return to office policy although the specifics of the policies are different for each company No employer was returning to full in office work We focused our literature review and interviews on the impact of remote work on employee collaboration firm culture and manager control which we call the 3 Cs We found that leaders maintain a belief that employee collaboration is negatively impacted by remote work but the evidence to support this assumption is mixed Firm culture is often cited by employers as an important rationale for bringing employees back to the office but the research evidence and our interviewees suggest that the notion of culture is vague and the idea that better culture is supported by in office work is not supported by any data Finally the shift to remote work caused corporate leaders and front line managers to worry about effectively managing employees they couldn't see every day We

found that companies did not widely begin implementing employee monitoring systems in lieu of onsite management. Our interviews suggest that much learning remains to transition managers and leaders to effectively managing remote or hybrid employees and teams.
