Lieb, 2013-06-29 The first edition of The Stability of Matter From Atoms to Stars was sold out after a time unusually short for a selecta collection and we thought it appropriate not just to make a reprinting but to include eight new contributions They demonstrate that this field is still lively and keeps revealing unexpected features Of course we restricted ourselves to developments in which Elliott Lieb participated and thus the heroic struggle in Thomas Fermi theory where $7/3 \times 5/3$ the accuracy has been pushed from Z^{-1} to Z^{-1} is not included A rich landscape opened up after Jakob Yngvason's observation that atoms in magnetic fields also are described in suitable limits by a Thomas Fermi type theory Together with Elliott Lieb and Jan Philip Solovej it was eventually worked out that one has to distinguish 5 regions If one takes as a dimensionless measure of the magnetic field strength B the ratio Larmor radius Bohr radius one can compare it with N/Z and for each of the domains $4/3 \leq B/N \leq 1$ $4/3 \leq B/N \leq 1$ $4/3 \leq B/N \leq 1$ $4/3 \leq B/N \leq 1$ $4/3 \leq B/N \leq 1$ a different version of magnetic Thomas Fermi theory becomes exact in the limit $N \rightarrow \infty$ In two dimensions and a confining potential quantum dots the situation is somewhat simpler one has to distinguish only i $B/N \leq 1$ ii $B/N \geq 1$ *Multifractals and 1/f Noise* Benoit B. Mandelbrot, 2013-12-20 Certain noises many aspects of turbulence and almost all aspects of finance exhibit a level of temporal and spatial variability whose wildness impressed itself vividly upon the author Benoit Mandelbrot in the early 1960s He soon realized that those phenomena cannot be described by simply adapting the statistical techniques of earlier physics or even extending those techniques slightly It appeared that the study of finance and turbulence could not move forward without the recognition that those phenomena represented a new second stage of indeterminism Altogether new mathematical tools were needed The papers in this Selecta volume reflect that realization and the work that Dr Mandelbrot did toward the development of those new tools **Model**
