### Strategies for Team Science Success

Kara L. Hall, Amanda L. Vogel, Robert T. Croyle, 2019-11-13 Collaborations that integrate diverse perspectives are critical to addressing many of our complex scientific and societal problems. Yet those engaged in cross disciplinary team science often face institutional barriers and collaborative challenges. *Strategies for Team Science Success* offers readers a comprehensive set of actionable strategies for reducing barriers and overcoming challenges and includes practical guidance for how to implement effective team science practices. More than 100 experts including scientists, administrators and funders from a wide range of disciplines and professions explain evidence based principles, highlight state of the art strategies, tools and resources and share first person accounts of how they've applied them in their own successful team science initiatives. While many examples draw from cross disciplinary team science initiatives in the health domain, the handbook is designed to be useful across all areas of science. *Strategies for Team Science Success* will inspire and enable readers to embrace cross disciplinary team science by articulating its value for accelerating scientific progress and by providing practical strategies for success. Scientists, administrators, funders and others engaged in team science will also leave equipped to develop new policies and practices needed to keep pace in our rapidly changing scientific landscape. Scholars across the Science of Team Science, SciTS, management, organizational, behavioral and social sciences, public health, philosophy and information technology among other areas of scholarship will find inspiration for new research directions to continue advancing cross disciplinary team science.

Mr. Science and Chairman Mao's Cultural Revolution Chunjuan Nancy Wei, Darryl E. Brock, 2013-01-01 Despite the verdict of the Cultural Revolution as a disaster for China, a number of scholars have called for reexamining socialist science under Mao's aegis. This collection examines the viewpoints on social and scientific enterprises of that era, probing medicine, the space program and the one child policy as outcomes of earlier Maoist science.
