Motivational Interviewing In Diabetes Care Applications Of Motivational Interviewing:

Motivational Interviewing in Diabetes Care Marc P. Steinberg, William R. Miller, 2015-08-12 People with diabetes often struggle to make healthy choices and stay on top of managing their illness. Filling a vital need, this is the first book to focus on the use of motivational interviewing (MI) in diabetes care. The uniquely qualified authors, physician Marc P. Steinberg and renowned clinical psychologist William R. Miller, are the codevelopers of MI. Present proven counseling techniques that can make any conversation with a patient more efficacious and motivating. Numerous sample dialogues illustrate specific ways to elicit patients' strengths and help them overcome barriers to change in such areas as eating habits, physical activity, medication use, insulin treatment, substance abuse, psychological issues, and more. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers. Winner First Place American Journal of Nursing Book of the Year Award, Adult Primary Care Category.

Motivational Interviewing in Health Care Stephen Rollnick, William R. Miller, Christopher C. Butler, 2022-08-02 The definitive guide to motivational interviewing (MI) for health care practitioners has been completely revised to reflect important developments and make the approach even more accessible. When it comes to helping patients manage chronic and acute conditions and make healthier choices in such areas as medication adherence, smoking, diet, and preventive care, good advice alone is not enough. This indispensable book shows how to use MI techniques to transform conversations about change. Even the briefest clinical interaction can serve to build trust, clarify patients' goals as well as reasons for ambivalence, and guide them to take positive steps. Vivid sample dialogues, tips, and scripts illustrate ways to incorporate this evidence-based approach into diverse health care settings. New to This Edition: Restructured around the four processes of MI—engaging, focusing, evoking, and planning. Incorporates lessons learned from the authors' ongoing clinical practice and practitioner training workshops. Chapters on advice giving, brief consultations, merging MI with assessment, MI in groups, and making telehealth consultations more effective. Additional practical features: extended case examples, Try This activities, and boxed reflections from practitioners in a range of contexts. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

Addiction Medicine Bankole A. Johnson, 2010-10-10 The spectrum of addiction disorders presents practitioners with numerous challenges, among them the widening gap between a growing evidence base and the translation of this knowledge into treatment outcomes. Addiction Medicine addresses this disconnect, clearly explaining the role of brain function in drug taking and other habit-forming behaviors and applying this biobehavioral framework to the delivery of evidence-based treatment. Its state-of-the-art coverage provides clinically relevant details on not only traditional sources of addiction such as cocaine, opiates, and alcohol, but also more recently recognized substances of abuse, e.g., steroids, inhalants, as well as behavioral addictions, e.g., binge eating, compulsive gambling, hoarding. Current behavioral and medical therapies are discussed in depth, and the book's close attention to social context gives

readers an added lens for personalizing treatment An international panel of expert contributors offers the most up to date information on Diagnosis and classification Neurobiological and molecular theories of addiction Behavioral concepts of addiction Clinical aspects of addiction to a wide range of substances including opiates stimulants sedatives hallucinogens alcohol nicotine and caffeine Science based treatment options pharmacotherapy pharmacogenetics potential vaccines brief and compliance enhancing interventions cognitive behavioral treatment behavioral management and other psychosocial interventions Behavioral addictions including compulsive eating Internet messaging and hypersexuality and their treatment Addiction in specific populations including adolescents the elderly pregnant women and health care professionals Legal disability and rehabilitation issues At once comprehensive and integrative Addiction Medicine is an essential text and a practice expanding tool for psychiatrists health psychologists pharmacologists social workers drug counselors trainees and general physicians family practitioners *The Patient as Agent of Health and Health Care* Mark Daniel Sullivan, 2017 Proposals for patient centered care for chronic illness have not understood or incorporated the capacity of patients to be active agents of health and health care Patients can not only make treatment choices but help define their clinical problem and its resolution This book examines patient action as the principal path to health and an essential component of it
