The John Muir Trail coincides with the PCT for approximately 160 miles until it splits east to the summit of Mount Whitney in Sequoia National Park. The high Sierra hiking season typically lasts from mid June through September. However, heavy snow can begin as early as October and linger until early July. The highest point on the PCT, Forester Pass (13,160 feet), will be found in the southern Sierra Nevada mountains on the boundary between Sequoia and King Canyon National Parks. The PCT spans 2,650 miles from the Canadian border through Washington, Oregon, and California to the southern terminus at the Mexican border. The famous trail crosses some of the most wild and scenic landscapes of the western U.S. including six national parks, 25 national forests, 48 wilderness areas, the volcanic Cascade Range of the Pacific Northwest, the snowcapped Sierra Nevada, and the Mojave and Sonoran deserts. Each PCT Topographic Map Guide includes detailed topographic maps at a scale of almost 1 inch = 1 mile. Each page is centered on the PCT and overlaps with the adjacent pages so there is little chance of getting lost. Along the bottom of each page is a trail profile that shows the distance between camping areas, trailheads, and other points of interest. The map and trail profile provide a step by step visual guide to hiking the trail mile by rugged mile. The Topographic Map Guide is built for all levels of hiking enthusiasts from the day tripper to the multi month thru hiker. The front pages of the printed Topographic Map Guide include resupply locations, health and safety information, and much more.
