This is a reference book for the entire project team who works on the deployment of an IP Telephony solution. Take advantage of best practices. Includes more than 200 best practices, lessons learned and tips for getting you through your IP Telephony deployment successfully. Minimize risk and learn from the mistakes of others. Read the list of the top 10 things that can go wrong during an IP Telephony deployment. Ask the right questions. Get the project team thinking and collaborating together with Stephanie's Checklist of Questions to Ask the Project Team. Use proven planning tools. Work from sample checklists, templates, project plans and workflow documents to guide your planning process. Keep the Steps to Success on the minds of your project team. Use the enclosed poster which illustrates every major step associated with an IP Telephony deployment. There is no better path to the successful implementation of a new technology than to follow in the experienced footsteps of an organization that has already been there. The Road to IP Telephony tells you how Cisco Systems successfully moved its own organization to a converged enterprise wide network. You will learn the implementation and operational processes, what worked, what didn't work, and how to develop your own successful methodology. After presenting this topic to hundreds of Cisco customers including Fortune 500 companies, Stephanie Carhee consistently encountered the same question: If I decide to move to IP Telephony, where do I begin and what can I do to ensure that I do it right the first time? Although the needs of every enterprise are different, some things are universal: planning, communication, teamwork and understanding your user's requirements are as important as technical expertise. The Road to IP Telephony shares with you everything you need to know about managing your deployment. It starts with where to begin, including what needs to be addressed before you even begin the planning process to building your project team. Key best practices are also offered to help you set the project's pace and schedule, get your users on board, identify a migration strategy, develop a services and support strategy and work toward the final PBX decommission.
