**DASH Diet For Beginners** Kirsten McCall, 2020-11-11 Are you looking for a weight loss solution Do you want to know how to Lose Weight Lower Your Blood Pressure Prevent Diabetes And Live Healthy If yes then keep reading DASH simply means for Dietary Approaches to Stop Hypertension Hypertension or having a high BP is a common but very serious health problem that was once called the silent killer By doing damage to blood vessels and key body organs it can lead to ill health and even death Some of the victims of high blood pressure have been world famous U S President Franklin Delano Roosevelt was among them sadly living in a time just before the first pharmaceutical treatments for and understanding of hypertension came about He died in 1945 near the end of the Second World War and some of the first effective treatments for high blood pressure were developed just a few years later in the 1950s This book covers the following topics DASH Diet and Preparing for DASH diet What Should You Eat What Shouldn't You Eat Getting into the DASH Diet 7 Day DASH Meal Plan Improvement How to live DASH Diet DASH Breakfasts DASH Lunches DASH Snacks and Appetizers DASH Dinners DASH Desserts And much more Roosevelt died from a cerebral hemorrhage which basically means a blood vessel in your brain bursts and it fills with blood killing off your brain cells He had multiple health problems and most of them could be traced to his high blood pressure We measure blood pressure in mm of mercury which is abbreviated mm Hg The reason this is done is that historically and often still today scientists measure pressure by seeing how far a thin column of mercury will rise inside a narrow glass tube or capillary Mercury is metal but its liquid at room temperature The properties of mercury made it ideal for measuring pressure If your blood pressure reached 200/100 or 300/195 it would be considered an emergency Back in those days FDR was allowed to continue his usual routine in daily life Today 200/100 would be considered an emergency requiring a visit to the emergency room while 300/195 would be considered absolutely catastrophic And of course it was when his blood pressure got that high he ended up dying Let's briefly talk about pipes and pumps so that we have some understanding of how blood pressure works You can imagine a water pumping system with a pump that pushes the water through the pipes Different pipes will lead to different conditions Without getting into the

physics and engineering behind it you can understand that pressure will go up if the pipes are narrow compared to pipes with a wider or larger diameter Also to get the same amount of water through the pump has to work harder or expend more energy to get that water through narrow pipes than it does through larger pipes The water also travels at a higher velocity and what happens if you break open the pipes The narrower the pipes the more forceful the water gushing out would be
