Medicine and Narration in the Eighteenth Century Sophie Vasset, 2013 How did doctors argue in eighteenth century medical pamphlet wars How literary or clinical is Diderot's depiction of mad nuns What is at stake in the account of a cataract operation at the beginning of Jean Paul's novel *Hesperus* In this pioneering volume contributors extend current research at the intersection of medicine and literature by examining the overlapping narrative strategies in the writings of both novelists and doctors Focusing on a wide variety of sources an interdisciplinary team of researchers explores the nature and function of narration as an underlying principle of such writing From a reading of correspondence between doctors as a means of continuing professional education to the use of inoculation as a plotting device or an examination of Diderot's physiological approach to mental illness in *La Religieuse* contributors highlight how doctors exploited rhetorical techniques

in both clinical writing and correspondence with patients how novelists incorporated medical knowledge into their narratives how models such as case histories or narrative poetry were adopted and transformed in both fictional and actual medical writing how these narrative strategies shaped the way in which doctors patients and illnesses were represented and perceived in the eighteenth century 1990, 白鳥圭三 白鳥圭三 白鳥圭三 白鳥圭三 白鳥圭三 *Edinburgh Companion to the Critical Medical Humanities* Whitehead Anne Whitehead,2016-06-14 Original critical engagements at the intersection of the biomedical sciences arts humanities and social sciencesIn this landmark Companion expert contributors from around the world map out the field of the critical medical humanities This is the first volume to comprehensively introduce the ways in which interdisciplinary thinking across the humanities and social sciences might contribute to critique and develop medical understanding of the human individually and collectively The thirty six newly commissioned chapters range widely within and across disciplinary fields always alert to the intersections between medicine as broadly defined and critical thinking Each chapter offers suggestions for further reading on the issues raised and each section concludes with an Afterword written by a leading critic outlining future possibilities for cutting edge work in this area Key FeaturesOffers an introduction to the second wave of the field of the medical humanitiesPositions the humanities not as additive to medicine but as making a decisive intervention into how health medicine and clinical care might think about individual subjective and embodied experienceExemplifies the commitment of the critical medical humanities to genuinely interdisciplinary thinking by stimulating multi disciplinary dialogue around key areas of debate within the fieldPresents thirty six original chapters from leading and emergent scholars in the field who are defining its new critical edge **The Honors Journal** ,1992
