is part of what made this book a three time recipient of the AJN Book of the Year award and among the most powerful nurse educator tools. It also helps nurse educators demonstrate concept building for research through the lens of middle range theory, a rigorous 10 phase process that moves from a practice story to a conceptual foundation and exemplars that clarify the concept building process. In short, this new edition keeps all the components that made prior versions so useful in nurse education and expands the content to make it better. New medical theory overtakes the old quickly, which is why this newly updated Fourth Edition includes. Reflects new theoretical advances with associated models to improve understanding. Five completely new chapters of content essential for nursing books. New exemplars linking middle range theory to advanced nursing practice. New content for DNP programs. Two new theories: Bureaucratic Caring and Self Care of Chronic Illness. Two articles from *Advances in Nursing Science* documenting a meta perspective about middle range theory development over the decades. Some of the key features in this award winning nurse book series include: Provides a strong contextual foundation for understanding middle range theory. Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation. Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory. Examines research application through exemplars demonstrating the use of middle range theory for advanced practice nursing. Includes Appendix summarizing middle range theories from 1988 to 2017. Excellent for doctorate and nursing programs alike.

**Nursing Theorists and Their Work - E-Book** Martha Raile Alligood, Ann Marriner Tomey, 2013-09-30. The most comprehensive of its kind, this classic resource in the field of nursing theory provides an in depth look at 49 theorists of historical, international, and significant importance. Each chapter features a clear, consistent presentation of a key nursing philosophy or theory. Case studies and critical thinking activities help bridge the gap between theory and application. A case study at the end of each theorist chapter puts the theory into a larger perspective, helping you understand how the information can be applied to practice. A Major Concepts/Definitions box in each theorist chapter outlines and summarizes the theory's most significant ideas and clarifies content specific vocabulary. Each theorist chapter concludes with an extensive bibliography outlining numerous primary and secondary sources of information, ideal for research projects. Critical Thinking Activities at the end of each theorist chapter challenge you to process the theory presented and apply it to personal and hypothetical practice situations. Introductory chapters provide you with a strong foundation in the history and philosophy of science, logical reasoning, and the theory development process. Diagrams for theories help you visualize and better understand inherently abstract concepts. Each theorist chapter is written by a scholar specializing in that particular theorist's work, often an individual who has worked closely with the theorist. Most chapters have been reviewed and edited by the theorist for currency and accuracy, further validating the accounts set forth in the text. Theorist birth and, if applicable, death dates help you place each individual into a time context. A new chapter introduces the theorist Afaf Meleis and covers her Transition Theory that has helped shape the theoretical development of nursing. Points for further study at the end of each

chapter direct you to assets available for additional information Need to know information is highlighted in at a glance summary boxes throughout to help you quickly review key concepts Personal quotes from the theorists help you gain insight and make each complex theory more memorable Updated references include only published works to ensure accuracy and credibility
