Advances in Computers Marvin Zelkowitz, 2003-08-19 Since 1960 *Advances in Computers* has chronicled the constantly shifting theories and methods of Information Technology which greatly shapes our lives today This volume the 59th in the series presents two general themes The first 4 papers discuss tool use in developing software how groups work together to produce a product and why the very industries that need them often do NOT adopt such tools The fifth paper addresses a current hardware issue cache coherence As we build faster machines a way to increase performance is to have multiple CPUs working on solving the same problem This requires two or more CPUs to address the same memory at the same time The cache coherence problem is how to allow both machines to access the same memory without stepping on each others toes so that memory gets lost or corrupted In depth surveys and tutorials on new computer technology Well known authors and researchers in the field Broad overview of many important developments Extensive bibliographies with most chapters Four out of 5 chapters focus on software development technology and should appeal to a software development organization or a university course on software development practices *Maximum PC*, 2008-04 *Maximum PC* is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews
