guide helping you master the powerful Arduino IoT Cloud ecosystem. This book begins by introducing you to the IoT landscape including its architecture, communication technologies and protocols and then to the capabilities of the Arduino IoT Cloud platform and the Cloud Editor. With practical projects such as monitoring air quality, building a portable asset tracker and creating a remote alarm system using the LoRaWAN specification, you'll learn how to implement real world IoT applications. Next you'll explore communication between IoT devices and cloud platforms as well as the implementation of the Arduino IoT Cloud SDK and JavaScript for advanced customization. You'll also find out how to program IoT nodes, analyze the surrounding environment data and visualize it on dashboards. Additionally, you'll get to grips with advanced features such as task scheduling, synchronization, remote over the air updates for IoT nodes and scripting with CCLI through hands on examples. By the end of this book, you'll have learned how to work with the Arduino IoT Cloud platform and related hardware devices and will be able to develop industry specific and cost effective IoT solutions such as smart homes and smart agriculture. What you will learn: Gain a solid understanding of IoT fundamentals and concepts. Build creative IoT projects using Arduino MKR boards, Pulse sensors and more. Master various communication technologies including LoRaWAN and 3G/4G. Harness data exchange between IoT devices and cloud platforms using Zapier or IFTTT. Explore advanced features like scheduling over the air updates and scripting. Understand easy to sync properties across multiple devices with no code. Develop voice assisted home automation and heart rate tracking applications. Who this book is for: This book is for aspiring IoT developers and seasoned professionals eager to harness the potential of Arduino and cloud integration as well as technology enthusiasts, students and hobbyists interested in experimenting with IoT technologies. Prior knowledge of basic electronics and embedded systems, cloud computing, Arduino and programming languages like C and JavaScript is needed.
