[A Cultural History of Shopping in the Modern Age](#) Vicki Howard, Jon Stobart, 2022. In the modern consumer age that emerged after the First World War, shopping became a ubiquitous cultural practice. Despite its apparent universality, the historicity and contingency of shopping should not be ignored; its meaning was always inextricably linked to the political, material, and economic contexts within which it took place. Gendered female for the most part, shopping continued to evoke different cultural responses, embraced as liberatory by some and condemned as frivolous by others. Business decisions and public policies helped construct the frameworks within which new, often American-led shopping cultures emerged, from downtown department stores to chain stores to suburban shopping malls. The digital revolution in shopping that began in the last decade of the twentieth century has changed the face of cities and towns and led to the closure of many bricks and mortar stores, but as this volume explores, the shopper remains very much at the centre of Western capitalist societies. *A Cultural History of Shopping in the Modern Age* presents an overview of the period with themes addressing practices and processes, spaces and places, shoppers and identities, luxury and everyday, home and family, visual and literary representations, reputation, trust, and credit, and governance, regulation, and the state.
