Brad,James C. Ha,2024-04-10 Humans have bred dogs for physical and behavioral characteristics for millennia These efforts can have unintended side effects however which may be either advantageous or cause issues such as a predisposition to certain medical complaints or controversially behavioural issues The scientific study of domestic dogs is still in its infancy but public demand for this

information is at a record high as more and more pet owners seek to understand their canine family members. Focusing on the behavioral differences and tendencies that have arisen in different breed lines this book explores, summarizes and explains the scientific evidence on what breed can tell us about behaviour and crucially what it cannot. Providing a comprehensive and approachable view of the science behind breed specific behaviors this book gives dog enthusiasts from all professional and personal backgrounds a better understanding of why dogs do what they do and how we can improve our relationships with our canine companions. Covering genetics, phylogeny of canids, temperament, aggression, social behavior and the history of dog breeding it is an important read for researchers, students, veterinary practitioners and animal behaviourists as well as shelter staff, dog trainers or anyone looking for a greater understanding of dog breed differences.

Shetland Sheepdogs Chapter provides you with a thorough description and positive attributes of this breed including origin, purpose, history, normal heights and weights, acceptable colors and behavioral traits. Our books differ from most books on dog breeds because this book also provides you with a comprehensive and authoritative source of all the known predisposed hereditary health syndromes for the breed. You will find extensive references for each problem described. We also provide the breed club address for this breed and a list of laboratories and organizations that can provide professional help and information. As a small animal veterinarian I have always been intrigued by the way dogs have been bred to fill a purpose in life and further impressed that they also tend to love performing that service. Greyhounds and other sight hounds are built for speed with aerodynamic bodies consisting of small head, deep chest, narrow waist and large leg muscles. On the other hand

Dachshunds take their name from German words meaning badger dog and they use their long nose long body and short legs to both track enter and dig into badger dens After developing a practice that catered to clients with show dogs my interest in each breed continued to grow as I studied and observed more and more about the unique predisposition and incidence of health problems in each breed Breeders of purebred dogs for show were a challenge and inspirational for me to research and help them with their unique health problems Historically references to hereditary problems are scattered throughout various Veterinary medical texts and journals such as ophthalmology neurology gastroenterology cardiovascular and dermatology This book as well as the other books and articles I have written is researched and compiled with the intention to provide both veterinarians and dog owners with comprehensive and authoritative predisposition information under the breed name At the date of this publication The American Kennel Club Canine Health Foundation and the The Kennel Club of England reports over 400 known hereditary health syndromes throughout the dog kingdom At the writing of my first book in 1983 less than 50 hereditary issues are able to be predicted and or diagnosed Sequencing of the canine genome DNA tests metabolic testing including blood tests and urine testing plus phenotypic examinations such as radiographs ultrasound and CERF or OFA eye registry exams by a Board Certified Veterinary Ophthalmologist have advanced the science of breed related health and behavioral problems This book will provide veterinarians researchers pet owners and breeders with a comprehensive guide to all the known problems veterinarians and dog owners should consider during pet selection and throughout each life stage of our canine friends
