Stephanie Matinpour, Stephanie Matinpour PharmD, 2020-07-05 Older adults as a group have more health conditions that require medication management. The average person over age 65 uses 4-5 prescription drugs and two over the counter medications at any given time. Drug therapy in seniors presents multiple challenges and adverse drug effects are frequently the source of problems commonly associated with aging such as confusion impaired motor function and depression. Good medication management in the senior population involves identifying and resolving adverse drug events instead of treating them with additional drugs. Learn from a Board Certified Geriatric Pharmacist about what you can do to minimize your risk of medication related problems or how to assist a loved one who is having difficulty safely managing their medications at home.

Medication: Management Matters Felicia C. Juntunen, California State University, Sacramento, 2012 Problems associated with the use of multiple medications or polypharmacy are amplified in older adults. This toolkit a web based set of modules provides instruments for the non medical student preparing for a career in geriatric care management or other aging services to assist the older adult and their caregivers in accomplishing safe and effective medication management according to professional and agency protocols. The four modules address the key themes of a) age related changes and medication b) the impact of medication adherence c) transitional care and d) issues for adults aging with intellectual and developmental disabilities. Background data development involved review of the literature and interviews with content experts. The standard for inclusion of electronically available resources established that each resource had to relate to either medication management and/or one of the four module themes. A web based format was chosen for the project supported by principles of adult learning theory reflected in the web site design. Each module includes a goal, objectives, activities that link users to available resources, self evaluation questions and references. Content was reviewed for currency, accuracy and evidence base by an expert panel. Representing future consumers a focus group evaluated the accessibility, clarity and relevance of the web site. Analysis of the project evaluation confirms the effectiveness of the project in accomplishing the aim to provide medication management education for gerontology students and entry level professionals. **CURRENT Geriatric Diagnosis and Treatment** C.
