Rami Vemula,2019-05-27 Design develop build and deliver an end to end serverless architecture by leveraging Azure services frameworks and tools This book offers a holistic approach guiding you through the design and development of a Twitter Bot application while leveraging Azure Functions Integrating Serverless Architecture begins with an overview of serverless computing and getting started with Azure Functions Here you will create a Twitter bot function which scans Twitter for the latest tweets and makes use of dependency injection Further you will learn about Azure Cosmos DB where you will cover its change feed mechanism and the repository pattern You will create a Cosmos DB trigger based tweet notifier function which will broadcast the latest tweets to connected clients You will explore the basics of Azure Service Bus and create a tweet scheduler function which will prioritize different keywords for the Twitter bot function Along the way you will debug deliver and test the functions in the Azure environment This book shows you how to secure your Azure Function secrets with the help of Azure Key Vault To further your understanding of the technology you will learn logging and exception handling in Azure Functions Later in the book you will build a Twitter bot web application by using ASP NET Core and Materialize CSS

which will interact with several HTTP based Azure Functions. The Twitter bot web application allows users to log in through the Twitter Identity Provider, subscribe to different keywords, hashtags, and browse the latest tweets based on subscriptions. You will get started with SignalR Service and integrate it with Azure Functions and web applications. Towards the end, you will go through app service authentication on Azure Functions and discover how to configure continuous integration and delivery to Azure Functions. After reading this book, you will be able to understand the steps involved in design, development, and delivery of a workflow using Azure Functions. What You Will Learn: Design and develop a Twitter bot application using Azure Functions with Azure Web App Service as the front end. Leverage Azure Cosmos DB as data storage and trigger notifications using its change feed mechanism. Store and retrieve secrets from Azure Key Vault. Integrate Azure Functions with Azure SignalR Service to broadcast real time messages. Secure Azure Functions by enabling Twitter identity authentication using built in App Service authentication. Build a continuous integration and continuous delivery pipeline for Azure Functions using Visual Studio Team Services (VSTS). Who This Book Is For: Developers, software engineers, and architects who design and manage infrastructures and build applications by leveraging Microsoft cloud services.

[Building Enterprise JavaScript Applications](#) Daniel Li, 2018-09-29
Strengthen your applications by adopting Test Driven Development (TDD), the OpenAPI Specification, Continuous Integration (CI), and container orchestration. Key Features: Create production grade JavaScript applications from scratch. Build microservices and deploy them to a Docker container for scaling applications. Test and deploy your code with confidence using Travis CI. Book Description: With the over abundance of tools in the JavaScript ecosystem, it's easy to feel lost. Build tools, package managers, loaders, bundlers, linters, compilers, transpilers, typecheckers—how do you make sense of it all? In this book, we will build a simple API and React application from scratch. We begin by setting up our development environment using Git, yarn, Babel, and ESLint. Then we will use Express, Elasticsearch, and JSON Web Tokens (JWTs) to build a stateless API service. For the front end, we will use React, Redux, and Webpack. A central theme in the book is maintaining code quality. As such, we will enforce a

Test Driven Development TDD process using Selenium Cucumber Mocha Sinon and Istanbul As we progress through the book the focus will shift towards automation and infrastructure You will learn to work with Continuous Integration CI servers like Jenkins deploying services inside Docker containers and run them on Kubernetes By following this book you would gain the skills needed to build robust production ready applications What you will learnPractice Test Driven Development TDD throughout the entire bookUse Cucumber Mocha and Selenium to write E2E integration unit and UI testsBuild stateless APIs using Express and ElasticsearchDocument your API using OpenAPI and SwaggerBuild and bundle front end applications using React Redux and WebpackContainerize services using DockerDeploying scalable microservices using KubernetesWho this book is for If you re a JavaScript developer looking to expand your skillset and become a senior JavaScript developer by building production ready web applications then this book is for you
