New Directions in Creative and Innovative Management Yuji Ijiri, Robert Lawrence Kuhn, 1988 *Educational Perspectives*, 1984 *Growth and Innovation of Competitive Regions* Ugo Fratesi, Lanfranco Senn, 2008-12-29 Time Time b a Space Space Time Time c d Space Space Fig 1 Different possible scales for growth and innovation analyses spatial dimension the sectoral dimension and the time dimension are represented In Fig 1a regional development analyses are revealed where the economy is sliced vertically into regions and their dynamics are investigated The study of the evolution of industries typical of evolutionary industrial economics is represented in Fig 1b where the economy is divided horizontally into sectoral slices This approach has progressed considerably in recent years see Malerba 2006 for a recent survey Modifications of industries have important spatial implications which however are not normally at the core of these analyses even though spatial patterns of innovation differ greatly from sector to sector Breschi 2000 Our approach operates in the manner of Fig 1a and we will focus on regions extending the analysis to industries only where this is regionally and structurally relevant Hence the approach in the book belongs to the tradition of regional development theories but in contrast to the more traditional analyses we will not consider

the region as an economic unit per se Rather interactions between and within regions are very relevant to the performance of individual regions in an integrated world and will be at the core of the analyses of the following chapters **Cartographic Perspectives** ,2000 **Creative Intention: about Audiovisual Communication, from Hollywood to John Doe** Ben Parker,Patricia Drabik,1974
