Handbook of Intelligence Robert J. Sternberg,2000-03-13 Not since the landmark publication of Handbook of Human Intelligence in 1982 has the field of intelligence been more alive than it is today Spurred by the new developments in this rapidly expanding field Dr Sternberg has brought together a stellar list of contributors to provide a comprehensive broad and deeply thematic review of intelligence that will be accessible to both scholar and student The field of intelligence is lively on many fronts and this volume provides full coverage on topics such as behavior genetic models evolutionary models cognitive models emotional intelligence practical intelligence and group difference Handbook of Intelligence is largely expanded covering areas such as animal and artificial intelligence as well as human intelligence It fully reflects important theoretical progress made since the

early 1980s **Annual Review of Gerontology and Geriatrics, Volume 17, 1997** K. Warner Schaie, PhD, 1997-11-10 In this timely volume prestigious contributors incorporate new knowledge from general psychology into a more comprehensive and accessible view of emotion in adult development and aging. The first chapter sets the stage by providing an overview of emotion across the entire life span. Subsequent chapters examine and consider thought provoking themes including how feelings are used in interpersonal communication across the years of adulthood, the linkage between stressful life events and the occurrence of disease, and the changes in emotional intensity and emotional understanding as we age. This volume is essential for general psychologists, gerontologists, researchers, and geriatric practitioners desiring to better their understanding of their older patients and clients. Fergus I. M. Craik, Timothy A. Salthouse, 2008 Cognitive aging is a flourishing area of research. This third edition reviews the findings and theories since the previous edition and evaluates the field's points of growth **Aging and Development** Peter G. Coleman, Ann O'Hanlon, 2017-02-03 The psychology of aging usually focuses upon cognitive changes with a particular focus on dementia and other forms of cognitive decline. But getting older is about more than simply changes to the brain and related health issues. Changes to our social and emotional lives are also hugely significant as we adapt across our lifespan. The second edition of Aging and Development is the only textbook available that responds to the growing interest in social, personal and emotional development in older age. Ideally suited to complement texts on cognitive change, the book provides a holistic developmental perspective on aging. It highlights a range of issues including the development of personal meaning and spirituality, improvements in emotional control, uses of reminiscence and life review, the importance of healthy attitudes to aging as well as the maintenance of close personal relationships. It does not avoid the difficult issues of late life decline but illustrates how even in circumstances of physical and mental frailty a positive sense of self can be created and enhanced. Fully updated to provide the most cutting edge overview on this burgeoning topic of interest, Aging and Development includes a glossary and list of useful websites both on the study of gerontology and the psychology of aging. It will be essential reading for all students of developmental psychology as well as anyone either training to work or already working with older people **Adult Development and Aging** William J. Hoyer, John M. Rybush, Paul Roodin, 1999 This edition offers a clear account of the salient issues and concerns that dominate the field of adult development. Gender differences and race/ethnic diversity are discussed in their relation to all major topics. There is also new coverage on the impact of religion and spirituality.
