Peter Spain *Questiones Animalibus Aristotelis*:

Peter of Spain, *Questiones super libro De Animalibus Aristotelis* Francisca Navarro Sánchez, 2017-05-15 This book presents an edition of the *Questiones super libro De Animalibus Aristotelis* a work by one of the greatest philosophers and physicians of the 13th century Peter of Spain later Pope John XXI 1205 1277 He took as the basis for his work the translation from the Arabic made in Toledo around 1220 by Michael Scotus which included three important Aristotelian treatises Preceding the critical edition Dr Navarro offers an introduction to the person and works of Peter of Spain the intellectual context of the 13th century characterized by Scholasticism and an Aristotelian Renaissance and a short analysis of the linguistics and form of the *Questiones* She also analyses the sources on which Peter drew Greco Latin Arabo Jewish and of course late antique and medieval treatises showing that the text was not exclusively zoological in nature but discusses important medical and philosophical topics illustrating his extensive knowledge of both the Aristotelian corpus and 13th century medicine The text divided into XIX books is not a mere commentary about animals but rather as the title shows a collection of questions in the Salernitan manner the use of which was considered most appropriate for analysis and communication in the medieval scientific community to which Peter of Spain belonged Alongside methodological and zoological problems Peter of Spain discusses important questions disputed among the scholars of the period including the location hierarchy motion function and parts of the principal organs the five senses and many other medical issues such as reproduction illnesses or growth Finally Dr Navarro includes a glossary that contains proper names mainly those of the authorities and sources quoted by Petrus Hispanus animal names and their parts and substances and the names of plants metals and the like

Aristotle's Animals in the Middle Ages and Renaissance Carlos G. Steel, Guy Guldentops, Pieter Beullens, 1999 Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture This volume explores how these texts have been read in various traditions Arabic Hebrew Latin and how they have been incorporated in different genres in philosophical and scientific treatises in florilegia and encyclopedias in theological symbolism in moral allegories and in manuscript illustrations This

multidisciplinary and multilingual approach highlights substantial aspects of Aristotle's animals *Fragmented Nature: Medieval Latinate Reasoning on the Natural World and Its Order* Mattia Cipriani, Nicola Polloni, 2022-06-09 The Latin Middle Ages were characterised by a vast array of different representations of nature These conceptualisations of the natural world were developed according to the specific requirements of many different disciplines with the consequent result of producing a fragmentation of images of nature Despite this plurality two main tendencies emerged On the one hand the natural world was seen as a reflection of God's perfection teleologically ordered and structurally harmonious On the other it was also considered as a degraded version of the spiritual realm a world of impeccable ideas separate substances and celestial movers This book focuses on this tension between order and randomness and idealisation and reality of nature in the Middle Ages It

provides a cutting edge profile of the doctrinal and semantic richness of the medieval idea of nature and also illustrates the structural interconnection among learned and scientific disciplines in the medieval period stressing the fundamental bond linking together science and philosophy on the one hand and philosophy and theology on the other This book will appeal to scholars and students alike interested in Medieval European History Theology Philosophy and Science

The Body as a Mirror of the Soul Lisa Devriese, 2021-10-05 Physiognomy the history of racial classifications and the interplay between natural philosophy medicine and ethics The idea of the body as a mirror of the soul has fascinated mankind throughout history Being able to see through an individual and drawing conclusions on their character solely based on a selection of external features is the subject of physiognomy and has a long tradition running well into recent times However the pre modern especially medieval background of this discipline has remained underexplored The selected case studies in this volume each contribute to a better understanding of the history of physiognomy from antiquity to the Renaissance and offer discussions on unedited treatises and on the application development and reception of this field of knowledge as well as on visual sources inspired by physiognomic theory Contributors Enik B k s Hungarian Academy of Sciences Jo l Biard University of Tours Lisa Devriese KU Leuven Maria Fernanda Ferrini University of Macerata Christophe Grellard cole Pratique des Hautes tudes Lu s Campos Ribeiro University of Lisbon Maria Michela Sassi University of Pisa Oleg Voskoboinikov Higher School of Economics Moscow Steven J Williams New Mexico Highlands University Joseph Ziegler University of Haifa Gabriella Zuccolin University of Pavia
